## +179%

increase in foreign sales over the last 4 years

40 years and more. The story of an all-Italian family and company, dedicated to **tradition** and **constant research**. Because who believes in the future and valuable ideas never quits growing.

Arcansas remained over the years a **family business** despite its strong growth. We're a solid company that can define long-term business goals and freely shape our future. Since 1980 we design, produce and distribute profiles for tillings, hygienic cove, floors and hardware/do-it-yourself on the national and international market.

## The story of a family

### 1980

Stelio Scriattoli founds **Arcansas Corporation** in Fano (Pu). A small company of 200 sq m, with **5 employees**. His dream? Commercialize on an industrial level profiles for construction and offer the market an innovative product. A winning idea thanks to which the company starts to consolidate its position and in 1984 moves to a larger site of 1000 square meters in Lucrezia (Pu).

### 1989/1990

Thanks to important investments in production technologies and most innovative materials available on the market, absolute innovations are presented in the profile market: **self-adhesive profiles** and profiles produced from profiling machine with **customized packaging**.

### 1991/1992

Stelio passes the helm of the company to his son Amedeo. The company continues to grow and in 1998 it also renews its communication with a rebranding operation: **Arcansas srl** is born.

### 2003/2004

It is the year of the turning point: the company opens to trade its profiles to the **large retail chains** and consolidates its market share in Italy.

### 1994/1995

Arcansas moves to its new 5500 sq m headquarter in Piagge (Pu). Investments in production technologies and the development of the product range continue. The **exclusive patented design of customizable display units for sales points** is introduced.

### 2018/2019

The Piagge plant expands and the production cycle is fully transferred to the new headquarter of Mondavio (Pu). The new **Arcansas warehouse in France** is inaugurated. The product range exceeds **5000 references**. A system for the **total traceability of products** and the **automated management of the warehouse** is introduced. New finishes for aluminum, pvc and stainless steel profiles are presented.

### 2013/2014

The third generation joins the company with Federico, Amedeo's son. **Export exceeds 30% of the turnover**. Arcansas regularly exports to over **34 countries**.

### 2007/2008

Arcansas becomes **leader of the large retail chains for profiles** on the Italian market. The new packaging for metal profiles is presented.

Future plans of the company? Manage fully the production cycle to guarantee our customers always more quality and more control on the finished product.

Amedeo Scriattoli, CEO

certifications /

# protocol

the character is recognized by its profile

We offer a **quality product**, certified and guaranteed thanks to the continuous tests on outgoing products, the exclusive use of first choice materials and full respect of the REACH requirements for the safety of human health and for the environment.

Since 2009 we have obtained various national and international certifications that have allowed to optimize and further improve our processes.

## **OHSAS 18001:2007**

### Safety and workers health management

This standard allows to manage in "an organic and systematic way" the safety of the workers without upsetting the company's organisation structure, improving its performances.

#### **Targets:**

- cancel or minimize the risks/dangers associated to the staff activity
- involve and motivate the staff thanks to trainings, improved and safer working conditions
- Ensure that internal audits are carried out at scheduled intervals, of fitness, adequacy and effectiveness controls

**Year of first issue:** 2010 (annual renewal)

## **ISO 9001:2015 | Quality system**

This internationally recognized standard, is the basis for the implementation of quality systems all over the world, instead of other requirements published in the past.

#### **Targets:**

- Improve credibility and image
- Improve the customer satisfaction
- Improve the processes that create value for the customer in terms of efficiency, elimination of wastefulness and minor number of errors.
- Improve decision-making
- Employees more involved and motivated to generate value

**Year of first issue:** 2003 (three-year renewal)

**Protezione con pellicola**  
 adesiva trasparente o termoretratta per permettere la maggior conservazione del profilo contro raggi UV, polvere e graffi. Ne permette inoltre il prelievo, la manipolazione ed il trasporto senza sporcare le mani e le superfici dell'auto. Si consiglia di rimuovere dopo l'installazione.

**Protective film:** Remove the special adhesive which has been used to protect the profile after installation. Thanks to the protective film that Arcansas provides to its profiles, complete protection against UV rays, dust and scratches is possible. Furthermore, the protective film guarantees an ideal solution for all types of finishes. It is transparent and protects the customer from grease residues that form in the profile.

**Film de protection:** adhésif transparent ou thermo rétractable pour permettre une meilleure conservation du profilé contre les rayons UV, la poussière et les rayures. Il permet également le prélèvement, la manipulation et le transport sans se salir les mains et les surfaces de la voiture. Il est conseillé de le supprimer après l'installation.

**Protección con película:** adhesivo transparente o termorretráctil para una mejor conservación del perfil contra rayos UV, polvo y arañazos. También permite la extracción la manipulación y el transporte sin ensuciar las manos y las superficies del coche. Se recomienda quitar después de la instalación.

**Disponibile su richiesta:** Gli articoli contrassegnati con questo simbolo vengono forniti per quantità minime d'ordine comunicate dall'ufficio commerciale.

**Available on request:** Items marked with this symbol are provided if the minimum order quantities communicated by the sales department are respected.

**Disponibile sur demande:** Les articles marqués de ce symbole sont fournis pour des quantités minimales de commande communiquées par le bureau de vente.

**Disponibile bajo petición:** Los artículos marcados con este símbolo se suministran para cantidades mínimas de pedido comunicadas por la oficina comercial.

**Codice EAN:** a tutti i profili contrassegnati da questo simbolo viene attaccata una etichetta contenente i dati principali per la corretta e certa identificazione del prodotto. I dati indicati sono: tracciabilità completa del prodotto in normativa GS1, codice alfanumerico, descrizione del prodotto, lunghezza, materiale e finitura.

**EAN code:** All profiles marked with this symbol are labelled with correct data for reliable identification of the product for the customer needs. These data are: complete traceability of the product in GS1 regulation, alphanumeric code, product description, length, material and finishing.

**Code EAN:** tous les profilés marqués de ce symbole portent une étiquette contenant les principales données nécessaires à l'identification correcte et certaine du produit. Les données indiquées sont: traçabilité complète du produit dans la norme GS1, code alphanumérique, description du produit, longueur, matériau et finition.

**Código EAN:** a todos los perfiles marcados con este símbolo se adjunta una etiqueta que contiene los datos principales para la correcta y cierta identificación del producto. Los datos indicados son: trazabilidad completa del producto en normativa GS1, código alfanumérico, descripción del producto, longitud, material y acabado.

**Materiale e misure**

*Material and sizes*

**Indirizzo produttore**

*Manufacturer address*

**Foratura:** i fori svasati permettono il perfetto alloggiamento della vite che rimane con la testa allineata al profilo. Le viti fornite sono dello stesso colore del profilo.

**Holes:** Screws fit perfectly with the screwhead laying flush with the surface of the profile, thanks to countersunk holes. The screws supplied are the same color as the profile.

**Perçage:** les trous évasés permettent le logement parfait de la visse qui reste avec la tête alignée au profilé. Les vissees fournies sont de la même couleur que le profilé.

**Taladrado:** los orificios avellanados permiten el alojamiento perfecto del tornillo que permanece con la cabeza alineada al perfil. Los tornillos suministrados son del mismo color que el perfil.

**Adesivo:** del tipo **Hot melt pressure sensitive** applicato a caldo (180°) direttamente sul profilo, è atossico. Può essere utilizzato a qualsiasi temperatura purchè non inferiore a 0°. Dopo l'installazione, l'adesivo diventa impermeabile all'acqua, solventi, detergenti e altri prodotti chimici. Prima dell'applicazione le superfici devono essere pulite ed esenti da grassi e polveri.

**Hot melt pressure sensitive Adhesive:** applied at a temperature of (180°) directly on to the profile and is non-toxic. It can also be used in lower temperatures to 0°. After installation of the profile the adhesive becomes resistant to water, solvents, detergents and other chemicals. Before application, all surfaces must be clean; free from grease and dust particles.

**Adhésif:** type **Hot melt pressure sensitive** appliqué à chaud (180°) directement sur le profilé. Il est non toxique. Il peut être utilisé à n'importe quelle température, à condition qu'elle ne soit pas inférieure à 0°C. Après l'installation, l'adhésif devient imperméable à l'eau, solvants, détergents et autres produits chimiques. Avant l'application, les surfaces doivent être propres et exemptes de matières grasses et de poussière.

**Adhesivo:** del tipo **Hot melt pressure sensitive** aplicado en caliente (180°) directamente sobre el perfil, es atóxico. Puede utilizarse a cualquier temperatura, siempre que no sea inferior a 0°. Tras la instalación, el adhesivo se vuelve impermeable al agua, disolventes, detergentes y otros productos químicos. Antes de su aplicación, las superficies deben estar limpias y exentas de grasa y polvo.

**Adesivo: Nastro biadesivo TESA** garantisce una maggior resistenza ed un'ottima durata nel tempo rispetto al pressure sensitive, le condizioni di uso possono essere verificate nella rispettiva tabella riportata di seguito.

**Adhesive: TESA double-sided tape** guarantees greater resistance and excellent durability over time compared to pressure sensitive, the conditions of use can be checked in the respective table below.

**Adhésif: Ruban adhésif double face TESA** garantit une plus grande résistance et une très bonne durée de vie par rapport à la pression sensitive, les conditions d'utilisation peuvent être vérifiées dans le tableau reporté ci-dessous.

**Adhesivo: Cinta adhesiva biadhesiva TESA** garantiza una mayor resistencia y una óptima duración en el tiempo respecto a las prensas sensitivas, las condiciones de uso se pueden verificar en la respectiva tabla a continuación.

**MEDIDAS**

La información, los dibujos y los datos dimensionales contenidos en esta lista incluyen medidas nominales. Las ilustraciones fotográficas están sujetas a variaciones de color con respecto a la realidad debido a la impresión.

**AVVERTENZE**

I profili Arcansas non necessitano di particolari manutenzioni e sono facilmente pulibili con alcool o mediante l'impiego di normali detergenti non a base acida. Si consiglia di impiegare spugne e/o panni non abrasivi per evitare di graffiare e/o danneggiare l'anodizzazione, la brillantatura, la verniciatura e la finitura. La resistenza agli agenti chimici dipende dal grado di aggressione e quindi è necessario assicurarsi in maniera preventiva dagli effetti dei prodotti impiegati per la pulizia, per la posa e la manutenzione. Calce, malte e adesivi per piastrelle possono provocare delle macchie sulla superficie a vista dei profili. E' quindi indispensabile pulire tali parti subito dopo la posa in opera.

**IMPORTANT NOTES**

Arcansas profiles do not require particular maintenance and are easily cleaned with alcohol or by using normal non-acid-based detergents. It is recommended to use non-abrasive sponges and / or cloths to avoid scratching and / or damaging the anodizing, brightening, painting and finishing. Resistance to chemical agents depends on the degree of aggression and therefore it is necessary to preventively ensure the effects of the products used for cleaning, laying and maintenance. Lime, mortar and tile adhesives can cause stains on the visible surface of the profiles. It is therefore essential to clean these parts immediately after installation.

**Blisteratura:** confezione termoretratta trasparente, resistente e appropriata per l'esposizione dei profili nell'espositore. Contiene istruzioni per la corretta applicazione del profilo.

**Blistering:** transparent, resistant and heat-shrink packaging for appropriate display of profiles. It contains instructions for the correct application of the profile.

**Blister:** emballage thermorétractable transparent, résistant et approprié pour l'exposition des profilés dans le présentoir. Il contient des instructions pour l'application correcte du profilé.

**Blisteratura:** envase termorretráctil transparente, resistente y adecuado para la exposición de los perfiles en el expositor. Contiene instrucciones para la correcta aplicación del perfil.

**Artículos disponibles en el almacén de Francia.**

**AVERTISSEMENTS**

Les profilés Arcansas ne nécessitent pas d'entretien particulier et sont faciles à nettoyer à l'alcool ou à l'aide de détergent normaux à base non acide. Il est recommandé d'utiliser des éponges et/ou des chiffons non abrasifs pour éviter de rayer et/ou d'endommager l'anodisation, le polissage, la peinture et la finition. La résistance aux agents chimiques dépend du degré d'agression et il est donc nécessaire de s'assurer préventivement des effets des produits utilisés pour le nettoyage, la pose et l'entretien. La chaux, les mortiers et les autocollants pour tuiles peuvent provoquer des taches sur la surface visible des profilés. Il est donc indispensable de nettoyer ces pièces immédiatement après la pose.

**ADVERTENCIAS**

Los perfiles Arcansas no requieren un mantenimiento especial y pueden limpiarse fácilmente con alcohol o utilizando detergentes normales sin ácido. Se recomienda utilizar esponjas y/o paños no abrasivos para evitar rayar y/o dañar la anodización, el pulido, la pintura y el acabado. La resistencia a los agentes químicos depende del grado de agresión y por lo tanto es necesario asegurarse de los efectos preventivos de los productos utilizados para la limpieza, la instalación y el mantenimiento. La cal, las maltas y los adhesivos para baldosas pueden provocar manchas en la superficie visible de los perfiles. Por lo tanto, es indispensable limpiar estas partes inmediatamente después de la colocación.

# productivity

the character is recognized by its profile

We transform **aluminum, stainless steel, brass, iron and pvc** into products with strong aesthetic and technical impact thanks to a **constant research of quality** in the raw materials.

The search of the best raw materials and the **variety of finishes available** are the first steps to create an excellent product. This is why we put great attention and care in the selection and research of the materials we produce our profiles. Our wide range of finishes goes from the brushed, chromed, copper aluminum to the glossy and mat pvc. The close collaboration with our suppliers allow us to develop and research **ad hoc products** to satisfy the very different needs of each customer.

“The beauty and care in the finishes show great attention to details, which is not obvious in the production of profiles.

*Quality control manager*

# Acciaio Inox e Ottone

Stainless Steel and Brass/Acier Inoxydable et Laiton/ Acero inoxidable y latón

## Acciaio Inox e Ottone:

I profili di protezione Arcansas sono una linea di profili progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze, in due materiali pregiati, in finitura lucida e spazzolata.

## Stainless steel and brass:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in two precious materials, with polished or brushed finishing and in different sections and heights.

## Acier inoxydable et laiton:

Les profilés de protection Arcansas sont une gamme de profilés conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs, en deux matériaux précieux, en finition polie et brossée.

## Acero inoxidable y latón:

Los perfiles de protección Arcansas son una línea de perfiles diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas, en dos materiales preciados, en acabado brillo y cepillado.

## Acciaio Inox:

Ottenuti per profilatura nella lega più nobile disponibile oggi sul mercato, AISI 304 V2A, grazie alla sua elevatissima inossidabilità e resistenza agli agenti meccanici e atmosferici, è adatto per interni ed esterni. Ha un aspetto elegante e solido. Adatto in edilizia, altamente protettivo e decorativo.

## Stainless steel:

Obtained by profiling in alloy AISI 304 V2A, the noblest alloy available on the market today, thanks to a very high resistance to rust and to mechanical and atmospheric agents, it is suitable for indoor and outdoor decoration. It has an elegant and solid appearance. Suitable for construction, highly protective and decorative.

## Acier inoxydable:

Obtenu par profilage dans l'alliage le plus noble disponible sur le marché aujourd'hui, l'AISI 304 V2A, grâce à sa très haute résistance à la rouille et sa résistance aux agents mécaniques et atmosphériques, convient pour l'intérieur et l'extérieur. Il a une apparence élégante et solide. Convient pour la construction. Hautement protecteur et décoratif.

## Acero inoxidable:

Obtenido al perfilar la aleación más noble disponible en el mercado hoy en día, AISI 304 V2A, gracias a su muy alta resistencia a la oxidación y resistencia a los agentes mecánicos y atmosféricos, es indicado sea para interiores y exteriores. Tiene un aspecto elegante y sólido. Idóneo en construcción, altamente protector y decorativo.

## Vantaggi:

Elevatissima resistenza alla corrosione acida, salina o agenti atmosferici. Adatto al calpestio. Idoneo per interni ed esterni. Fornito con pellicola protettiva per la massima lavorabilità senza graffi o macchie. Manutenzione assente. Riciclabile nei metalli.

## Advantages:

Very high resistance to acid, saline or atmospheric agent's corrosion. Suitable for foot traffic. Well-suited for indoors and outdoors. Supplied with protective film for maximum workability without scratches or stains. No maintenance. Recyclable.

## Avantages:

Très haute résistance à la corrosion acide, saline ou atmosphérique. Ne craint pas le piétinement. Convient pour l'intérieur et l'extérieur. Fourni avec un film protecteur pour une facilité d'usage et un résultat sans rayures ni taches. Aucun entretien. Recyclable en métaux.

## Ventajas:

Muy alta resistencia a la corrosión por agentes ácidos, salinos o atmosféricos. Resistente a las pisadas. Idoneo para interior y exterior. Se suministra con película protectora para una máxima trabajabilidad sin arañazos ni manchas. Sin mantenimiento. Reciclabile en metales.

## Ottone lucido:

Profili ottenuti da estrusione della lega OT57 e, a seconda dell'articolo, lucidati meccanicamente con paste lucidanti. Ottima resistenza agli agenti chimici, atmosferici e alle sollecitazioni meccaniche. La superficie brillante e il colore tipico dell'ottone rendono questi profili altamente adatti in ambito decorativo.

## Polished brass:

Profiles obtained by extrusion of alloy OT57 and, depending on the article, mechanically polished with polishing pastes. Excellent resistance to chemical agents and mechanical stress. The bright surface and the typical color of the brass make these profiles highly suitable in the decorative field.

## Laiton poli:

Profilés obtenus par extrusion de l'alliage OT57 et, selon l'article, polis mécaniquement avec des pâtes à polir. Excellente résistance aux agents chimiques, atmosphériques et aux contraintes mécaniques. La surface brillante et la couleur typique du laiton rendent ces profilés très appropriés dans le domaine décoratif.

## Latón cromado:

Perfiles obtenidos por extrusión de la aleación OT57 y, según el producto, cromado mecánicamente con pastas de pulido. Excelente resistencia a agentes químicos, atmosféricos y al estrés mecánico. La superficie brillante y el color típico del latón hacen que estos perfiles sean muy adecuados en el ámbito decorativo.

## Vantaggi:

Elevatissima resistenza alla corrosione acida, salina o agenti atmosferici. Adatto al calpestio. Idoneo per interni ed esterni. Fornito con pellicola protettiva per la massima lavorabilità senza graffi o macchie. Manutenzione assente. Riciclabile nei metalli.

## Advantages:

Very high resistance to acid, saline or atmospheric agent's corrosion. Suitable for foot traffic. Well-suited for indoors and outdoors. Supplied with protective film for maximum workability without scratches or stains. No maintenance. Recyclable.

## Avantages:

Très haute résistance à la corrosion acide, saline ou atmosphérique. Ne craint pas le piétinement. Convient pour l'intérieur et l'extérieur. Fourni avec un film protecteur pour une facilité d'usage et un résultat sans rayures ni taches. Aucun entretien. Recyclable en métaux.

## Ventajas:

Muy alta resistencia a la corrosión por agentes ácidos, salinos o atmosféricos. Resistente a las pisadas. Idoneo para interior y exterior. Se suministra con película protectora para una máxima trabajabilidad sin arañazos ni manchas. Sin mantenimiento. Reciclabile en metales.

BRASCER	Finitura - Finish	Caratteristiche	EAN	Cod.	H. (mm)	L. (m)	Conf. - Carton	Min. ord.
	 ottone naturale natural brass		8013237060398	061B6A	8	1,0	10	5
			8013237061272	061B7	10	2,50	10	5
			8013237060404	061B7B	10	1,0	10	5

**Ottone naturale:**  
Profili ottenuti per estrusione, non sottoposti a trattamento di lucidatura meccanica con paste lucidanti. Ottima resistenza agli agenti chimici e alle sollecitazioni meccaniche. La superficie opaca e il colore tipico dell'ottone rendono questi profili non invasivi e adatti in ambito decorativo.

**Vantaggi:**  
Elevatissima resistenza alla corrosione acida, salina o agenti atmosferici. Adatto al calpestio. Per uso interno o esterno. Altamente inossidabile. Scarsa manutenzione. Riciclabile nei metalli.

**Natural brass:**  
Profiles obtained by extrusion, not mechanically polished with polishing pastes. Excellent resistance to chemical agents and mechanical stress. The opaque surface and the typical colour of the brass make these profiles discreet and suitable for decorative purposes.

**Advantages:**  
Very high resistance to acid, saline or atmospheric agent's corrosion. Suitable for foot traffic. Well-suited for indoors and outdoors. Highly stainless. No maintenance. Recyclable.

**Laiton naturel :**  
Profils obtenus par extrusion, non soumis à un traitement de polissage mécanique avec des pâtes à polir. Excellente résistance aux agents chimiques et aux contraintes mécaniques. La surface opaque et la couleur typique du laiton rendent ces profilés discrets et adaptés dans le domaine décoratif.

**Avantages :**  
Très haute résistance à la corrosion acide, saline ou atmosphérique. Ne craint pas le piétinement. Pour un usage extérieur ou intérieur. Hautement inoxydable. Très peu d'entretien. Recyclable en métaux.

**Latón natural:**  
Perfiles obtenidos por extrusión, no sometidos a tratamiento mecánico de pulido con pastas de pulido. Excelente resistencia a los agentes químicos y al estrés mecánico. La superficie opaca y el color típico del latón hacen que estos perfiles no sean invasivos y adecuados para el ámbito decorativo.

**Ventajas:**  
Muy alta resistencia a la corrosión por agentes ácidos, salinos o atmosféricos. Resistente a las pisadas. Idoneo para interior y exterior. Altamente inoxidable. Escaso mantenimiento. Reciclabile en metales.

# Alluminio naturale e anodizzato satinato

Raw and satin anodised alu/ Alu naturel et anodisé satiné/ Alu natural y anodizado satinado

## Alluminio naturale e anodizzato satinato:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Subisce un trattamento di ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il profilo. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6000 per ottenere una colorazione uniforme dal massimo grado di finitura estetica oltre che funzionale.

## Vantaggi:

Facilmente lavorabili grazie alla duttilità di questa lega. Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all' alluminio naturale. Elevata resistenza ai graffi ( non propria dell'alluminio naturale). Adatto per interni ed esterni. Riciclabile nell' alluminio.

## Raw and satin anodised aluminium:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

The aluminum profile undergoes an anodic oxidation treatment by immersion in electrolytic tanks first and subsequently in colour tanks to create a protective layer that protects the profile. For the highest quality of protection, Arcansas guarantees a treatment thickness of 10 to 15 µm depending to the colour type. Arcansas uses the 6000 alloy to obtain a uniform colouring with the highest degree of aesthetic as well as functional finish.

## Advantages :

Easily workable thanks to the ductility of this alloy. High increase in resistance to acid, saline or weathering corrosion compared to natural aluminium. High scratch resistance. Suitable for indoors and outdoors. Recyclable.

## Aluminium naturel et anodisé satiné :

Les profils de protection Arcansas sont une gamme de profils en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

La transformation de ce matériau commence par sa plongée dans des cuves électrolytiques qui permettent l'oxydation anodique. Dans la phase suivante les produits passent dans des cuves de peinture. Dans les dernières cuves de ce long procédé la couleur est fixée et une couche protectrice qui protège le profilé est créée. L'épaisseur du traitement Arcansas est de 10 à 15 micron (selon la couleur) pour garantir une protection optimale. Afin d'obtenir une coloration uniforme Arcansas utilise une ligue 6000, qui donne au produit une finition esthétique maximale mais aussi fonctionnelle.

## Avantages :

Facile à utiliser grâce à la ductilité conférée par la ligue 6000. Résistance à la corrosion acide, saline et aux intempéries (majeure par rapport aux profils en aluminium naturel). Adaptables à l'intérieur et extérieur. Aluminium 100% recyclable.

## Aluminio natural y anodizado satinado:

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Se somete a un tratamiento de oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques del color que luego se fija en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el perfil. Arcansas garantiza un espesor de tratamiento de 10 a 15 µm según el tipo de color para la más alta calidad de protección. Arcansas utiliza la aleación 6000 para obtener una coloración uniforme con el más alto grado de acabado estético y funcional.

## Ventajas :

Fácilmente mecanizable gracias a la ductilidad de esta aleación. Elevado aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural. Alta resistencia al rayado. Adecuado para interiores y exteriores. Reciclabile en el aluminio.

# Alluminio Anodizzato Lucido

Polished anodised Alu/ Alu Anodisé Brillant/ Alu Anodizado Brillo

## Alluminio anodizzato lucido:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Ottenuti mediante estrusione dell'alluminio, prima di poter essere anodizzato, subisce un trattamento meccanico di lucidatura a specchio per eliminare ogni imperfezione tipica del processo di estrusione e conferire al profilo una finitura brillante a specchio, altamente decorativa. Viene sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 5 a 10µm secondo il tipo di colore per la massima qualità di brillantezza. Arcansas impiega la lega 6063 per ottenere una colorazione brillante ed uniforme dal massimo grado di finitura estetica oltre che funzionale.

## Vantaggi:

Altamente decorativo.  
Facilmente lavorabile grazie alla duttilità di questa lega.  
Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale.  
Buona resistenza ai graffi (non propria dell'alluminio naturale).  
Adatto per interni ed esterni.  
Riciclabile nell'alluminio.

## Polished anodised Aluminium:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings.  
Available in different sections, heights and finishing.

Obtained by extruding aluminium, before anodization, it undergoes a mechanical mirror polishing treatment to eliminate any imperfection typical of the extrusion process and give the profile a highly decorative mirror shine finish. The anodic anodization process, done by immersion in electrolytic tanks and subsequently in the colour tanks, creates a protective layer that protects the colour itself. Arcansas guarantees a treatment thickness from 5 to 10µm according to the type of colour for the maximum quality of brilliance. Arcansas uses alloy 6063 to obtain a bright and uniform colouring with the highest degree of aesthetic as well as functional finish.

## Advantages :

Highly decorative.  
Easily workable thanks to the ductility of this alloy.  
High increase in resistance to acid, saline or weathering corrosion compared to natural aluminium.  
Good scratch resistance (not typical of natural aluminium).  
Suitable for indoors and outdoors.  
Recyclable.

## Aluminium anodisé brillant:

Les profils de protection Arcansas sont une gamme de profils en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

Obtenu par extrusion d'aluminium, avant d'être anodisé, il subit un traitement mécanique de polissage miroir pour éliminer toute imperfection typique du processus d'extrusion et conférer au profilé une finition miroir hautement décorative. Il est soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur qui est ensuite fixée dans les derniers réservoirs du long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 5 à 10µm selon le type de couleur pour une qualité de brillance maximale. Arcansas utilise l'alliage 6063 afin d'obtenir une coloration brillante et uniforme pour une finition hautement esthétique et fonctionnelle.

## Avantages :

Très décoratif.  
Facile à travailler grâce à la ductilité de cet alliage.  
Grande augmentation de la résistance à la corrosion acide, saline ou aux intempéries par rapport à l'aluminium naturel.  
Bonne résistance aux rayures (non typique de l'aluminium naturel).  
Convient pour l'intérieur et l'extérieur.  
Recyclable en aluminium.

## Aluminio anodizado brillo:

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Obtenido por extrusión de aluminio, antes de ser anodizado, se somete a un tratamiento mecánico de pulido espejo para eliminar cualquier imperfección típica del proceso de extrusión y darle al perfilé un acabado de brillo espejo altamente decorativo. Se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en los tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un espesor de tratamiento de 5 a 10 µm según el tipo de color para obtener la máxima calidad de brillo. Arcansas utiliza la aleación 6063 para obtener una coloración brillante y uniforme con el más alto grado de acabado estético y funcional.

## Ventajas :

Altamente decorativo.  
Fácilmente mecanizable gracias a la ductilidad de esta aleación.  
Alto aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural.  
Buena resistencia al rayado (no es típico del aluminio natural).  
Adecuado para interiores y exteriores.  
Reciclabile en el aluminio.

# Alluminio Anodizzato Spazzolato

## Anodised Brushed Alu/Alu Anodisé Brossé/ Alu Anodizado Cepillado

**Alluminio anodizzato spazzolato:**  
I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Prima di poter essere anodizzato, subisce un trattamento meccanico di speciale spazzolatura in acqua per eliminare ogni imperfezione tipica del processo di estrusione e conferire al profilo una finitura spazzolata e dai riflessi lucidi, altamente decorativa. Viene sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6060 per ottenere una colorazione spazzolata e dai riflessi variegati per il massimo grado di finitura estetica oltre che funzionale.

**Vantaggi:**  
Altamente decorativo.  
Facilmente lavorabile grazie alla duttilità di questa lega.  
Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale.  
Buona resistenza ai graffi (non propria dell'alluminio naturale).  
Adatto per interni ed esterni.  
Riciclabile nell'alluminio.

**Anodised Brushed Aluminum:**  
Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

Before being anodised, it undergoes a mechanical treatment of special brushing in water to eliminate any imperfection typical of the extrusion process and give the profile a highly decorative brushed finish with glossy reflections. It is then dipped in the electrolytic tanks for anodic oxidation and subsequently in the colour tanks to create a protective layer that protects the profile. For the maximum quality of brilliance, Arcansas guarantees a treatment thickness of 10 to 15 µm depending to the colour type. For the maximum degree of aesthetic as well as functional finish, Arcansas uses the alloy 6060 to obtain a brushed color and variegated reflections.

**Advantages :**  
Highly decorative.  
Easily workable thanks to the ductility of this alloy.  
High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum.  
Good scratch resistance (not typical of natural aluminum).  
Suitable for indoors and outdoors.  
Recyclable.

**Aluminium Anodisé Brossé:**  
Les profils de protection Arcansas sont une gamme de profils en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

Avant d'être anodisé, il subit un traitement mécanique de broyage spécial à l'eau pour éliminer toute imperfection typique du processus d'extrusion et donner au profilé une finition brossée très décorative aux reflets brillants. Il est soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur ou celle-ci est fixée dans les derniers réservoirs de ce long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 10 à 15 µm selon le type de couleur pour une protection de la plus grande qualité. Arcansas utilise l'alliage 6060 pour obtenir une couleur brossée et des reflets moirés avec un degré maximal de finition esthétique et fonctionnelle.

**Avantages :**  
Très décoratif.  
Facile à travailler grâce à la ductilité de cet alliage.  
Grande augmentation de la résistance à la corrosion acide, saline ou aux intempéries par rapport à l'aluminium naturel.  
Bonne résistance aux rayures (non typique de l'aluminium naturel).  
Convient pour l'intérieur et l'extérieur.  
Recyclable en aluminium.

**Aluminio Anodizado Cepillado:**  
Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Antes de ser anodizado, se somete a un tratamiento mecánico de cepillado especial en agua para eliminar cualquier imperfección típica del proceso de extrusión y darle al perfil un acabado cepillado con reflejos brillantes altamente decorativo. Se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un espesor de tratamiento de 10 a 15 µm de acuerdo con el tipo de color para la más alta calidad de protección. Arcansas utiliza la aleación 6060 para obtener un color cepillado y reflejos variados para obtener el máximo grado de acabado estético además que funcional.

**Vantajas :**  
Altamente decorativo.  
Fácilmente mecanizable gracias a la ductilidad de esta aleación.  
Alto aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural.  
Buena resistencia al rayado (no es típico del aluminio natural).  
Adecuado para interiores y exteriores.  
Reciclabile en el aluminio.

# Alluminio Verniciato

Powder Coated alu/ Alu verni/ Alu pintado

## Alluminio verniciato:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche invrudite a forno, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e preverniciatura per conferire resistenza e massima adesione alla successiva verniciatura. Arcansas garantisce uno spessore minimo di 80 micron e una brillantezza di 100 gloss. Disponibile nei colori bianco RAL 9003 e nero RAL 9005.

## Vantaggi:

Finitura estetica di pregio.  
Resistente ai raggi ultravioletti.  
Resistente ai graffi.  
Riciclabile.

## Powder Coated Aluminum :

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

Obtained by extrusion and subsequent painting with electrostatic epoxy powders hardened in the oven, they are previously treated with a special degreasing and pre-painting process to give resistance and maximum adhesion to the subsequent painting. Arcansas guarantees a minimum thickness of 80 microns and a gloss of 100 gloss. Available in white RAL 9003 and black RAL 9005.

## Advantages:

Fine aesthetic finish.  
Resistant to ultraviolet rays.  
Scratch resistant.  
Recyclable.

## Aluminium Verni :

Les profils de protection Arcansas sont une gamme de profils en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

Obtenu par extrusion et ultérieur vernissage avec des poudres époxy électrostatiques durcies au four, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante. Arcansas garantit une épaisseur minimale de 80 microns et un brillant de 100 brillants. Disponible en blanc RAL 9003 et noir RAL 9005.

## Les avantages:

Finition esthétique de haute qualité.  
Résistant aux rayons ultraviolets.  
Résistant aux rayures.  
Recyclable.

## Aluminio Pintado :

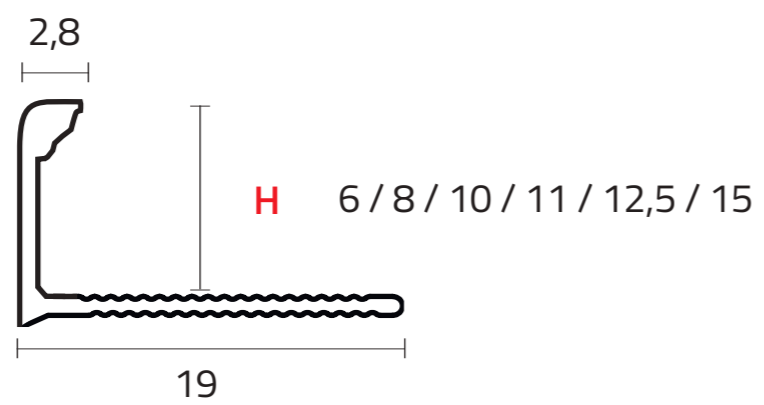

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Obtenidos por extrusión y pintura sucesiva con polvos epoxídicos electrostáticos endurecidos en el horno, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura posterior. Arcansas garantiza un espesor mínimo de 80 micras y un brillo de 100 gloss. Disponible en los colores blanco RAL 9003 y negro RAL 9005.

## Ventajas:

Acabado estético de alta calidad.  
Resistente a los rayos ultravioleta.  
Resistente a los arañazos.  
Reciclabile.

# Alluminio effetto Pietra

Stone Finish Alu/ Alu Effet Pierre/ Alu Efecto Piedra

## Alluminio effetto pietra:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e pre-verniciatura per conferire resistenza e massima adesione alla successiva verniciatura.

Queste finiture si adattano perfettamente alle nuove tendenze di arredamento delle piastrelle ceramiche effetto pietra, con finiture opache e naturali.

Arcansas garantisce uno spessore minimo di 80 micron, disponibile nei colori pietra naturali.

## Vantaggi:

Finitura estetica di pregio.  
Resistente ai raggi ultravioletti.  
Molto resistente ai graffi.  
Riciclabile nell'alluminio.

## Stone Finish Aluminum:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

Obtained by extrusion and subsequent painting with electrostatic epoxy powders, they are previously treated with a special degreasing and pre-painting process to give resistance and maximum adhesion to the subsequent painting.

These finishes are perfectly suited to the new furnishing trends of stone effect ceramics, with matte and natural finishes.

Arcansas guarantees a minimum thickness of 80 microns, available in natural stone colors.

## Advantages:

Fine aesthetic finish.  
Resistant to ultraviolet rays.  
Very resistant to scratches.  
Recyclable.

## Aluminium Effet Pierre:

Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

Obtenus par extrusion et peinture ultérieure avec des poudres époxy électrostatiques, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante.

Ces finitions sont parfaitement adaptées aux nouvelles tendances d'ameublement du céramique effet pierre, avec des finitions mates et naturelles.

Arcansas garantit une épaisseur minimale de 80 microns, disponible en couleurs de pierre naturelle.

## Avantages:

Finition esthétique de haute qualité.  
Résistant aux rayons ultraviolets.  
Très résistant aux rayures.  
Recyclable.

## Aluminio Efecto Piedra:

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Obtenidos por extrusión y pintura sucesiva con polvos epoxídicos electrostáticos, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura posterior.

Estos acabados se adaptan perfectamente a las nuevas tendencias de decoración de cerámica con efecto de piedra, con acabados mate y natural.

Arcansas garantiza un espesor mínimo de 80 micras, disponible en colores de piedra natural.

## Ventajas:

Acabado estético de alta calidad.  
Resistente a los rayos ultravioleta.  
Muy resistente a los arañazos.  
Reciclabile.

# PVC Satinato

Satin PVC/ PVC satiné/PVC satinado

**PVC Satinato:**

i profili di protezione Arcansas sono una linea di profili progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e colori.

Ottenuti per estrusione plastica, i profili in PVC Arcansas sono colorati in massa. Non cambiano colore se graffiati. Rappresentano la soluzione ideale per DIYers grazie alla versatilità e alla facilità di utilizzo. Disponibile in molteplici varietà di colore.

**Vantaggi:**

Colorato in massa, non perde il colore se graffiato.  
Grande disponibilità di colori.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Buona resistenza meccanica e ai raggi UV.  
Durata nel tempo.  
Prezzo competitivo.  
Riciclabile nella plastica.

**Satin PVC:**

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and colours. Obtained by plastic extrusion, AR-CANSAS profiles are mass coloured. They do not change colour if scratched.

They represent the ideal solution for DIYers thanks to their versatility and ease of use. Available in several colour nuances.

**Advantages:**

Mass-coloured, does not lose colour if scratched.  
Wide range of colours.  
Ease of use: can be cut with a cutter or scissors.  
Good mechanical and UV resistance  
Durability.  
Competitive price.  
Recyclable.

**PVC satiné:**

Les profilés de protection Arcansas sont une gamme de profilés conçus pour connecter et protéger les coins externes du revêtement en carrelage. Disponible en différentes sections, hauteurs et couleurs. Obtenus par extrusion du plastique, les profilés PVC Arcansas sont colorés en masse. Ils ne changent pas de couleur s'ils sont rayés.

Ils représentent la solution idéale pour les bricoleurs grâce à leur polyvalence et leur facilité d'utilisation. Disponible en plusieurs variétés de couleurs.

**Avantages:**

Coloré en masse, il ne perd pas de couleur s'il est rayé.  
Grande disponibilité de couleur.  
Facilité d'usage: peut être coupé avec un cutter ou des ciseaux.  
Bonne résistance mécanique et aux UV.  
Durée dans le temps.  
Prix compétitif.  
Recyclable en plastique.

**PVC satinado:**

Los perfiles de protección de Arcansas son una línea de perfiles diseñados para unir y proteger las esquinas externas del revestimiento en cerámico. Disponible en diferentes secciones, alturas y colores.

Obtenidos por extrusión de plástico, los perfiles de PVC Arcansas tienen son coloreados en la masa. No cambian de color si se rayan. Representan la solución ideal para aficionados al bricolaje gracias a su versatilidad y facilidad de uso. Disponible en múltiples variedades de color.

**Ventajas:**

Coloreado en masa, no pierde color si se raya.  
Gran disponibilidad de colores.  
Facilidad de uso: se puede cortar con un cortador o tijeras.  
Buena resistencia mecánica y a los rayos UV.  
Duración en el tiempo.  
Precio competitivo.  
Reciclabile en el plástico.

# PVC Extra Lucido

Extra Shiny PVC/ PVC Extra Brillant/ PVC Extra Brillante

## PVC Extra lucido:

Ottenuti mediante una speciale tecnica di estrusione plastica, i profili di protezione Arcansas sono una linea di profili progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e colori.

Speciale lavorazione che conferisce una superficie brillantissima come fosse alluminio verniciato a polveri epossidiche. Colorato in massa, non perde il colore se graffiato.

Rappresentano la soluzione ideale per professionisti e DIYers grazie alla elevata qualità estetica e alla facilità di utilizzo. Disponibile in moltissimi colori oltre agli eleganti bianco, nero.

## Vantaggi:

Grande disponibilità di colori vivaci e decorativi.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Buona resistenza meccanica e ai raggi UV.  
Durata nel tempo.  
Riciclabile nella plastica.

## Extra shiny PVC:

Obtained by a special extruding technique, Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and colours.

Thanks to a special processing, the profile has a very bright surface and looks like aluminum painted with epoxy powders. Mass-coloured, it does not lose the colour if scratched.

These profiles represent the ideal solution for professionals and DIYers thanks to their high aesthetic quality and ease of use. Available in many colours besides the elegant white and black.

## Advantages:

Wide range of vivid and decorative colours.  
Ease of use: can be cut with a cutter or scissors.  
Good mechanical and UV resistance  
Durability.  
Recyclable.

## PVC extra brillant :

Obtenus grâce à une technique d'extrusion plastique spéciale, les profils de protection Arcansas sont une gamme de profils conçus pour connecter et protéger les coins externes des revêtements carrelage. Disponible en différentes sections, hauteurs et couleurs.

Un traitement spécifique permet de donner au profilé une surface très brillante comme s'il s'agissait d'aluminium enduit de poudre époxy. Coloré en masse, il ne la perd pas s'il est rayé.

Ils représentent la solution idéale pour les professionnels et les bricoleurs grâce à leur haute qualité esthétique et leur facilité d'utilisation. Disponible en plusieurs couleurs en plus de l'élégant blanc, noir.

## Avantages:

Grande disponibilité de couleurs vives et décoratives.  
Facilité d'utilisation : peut être coupé avec un cutter ou des ciseaux.  
Bonne résistance mécanique et aux UV.  
Durée dans le temps.  
Recyclable en plastique.

## PVC extra brillante:

Obtenidos a través de una técnica especial de extrusión de plástico, los perfiles de protección Arcansas son una línea de perfiles diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y colores.

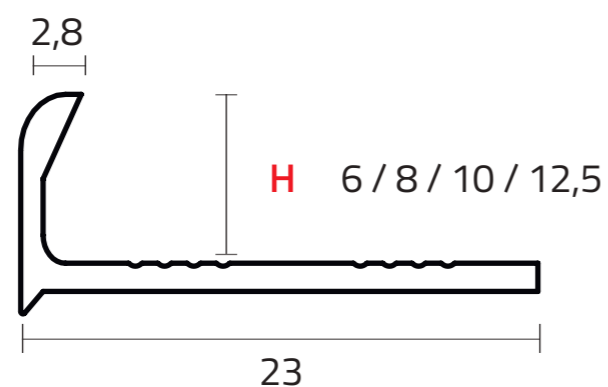

Procesamiento especial que confiere una superficie muy brillante como si fuera aluminio pintado con polvo epoxi.

Coloreado en masa, no pierde color si se raya.  
Representan la solución ideal para profesionales y aficionados al bricolaje gracias a su alta calidad estética y facilidad de uso. Disponible en muchos colores además del elegante blanco y del elegante negro.

## Vantajas:

Gran disponibilidad de colores brillantes y decorativos.  
Facilidad de uso: se puede cortar con un cortador o tijeras.  
Buena resistencia mecánica y a los rayos UV.  
Duración en el tiempo.  
Reciclabile en el plástico.

# PVC Rivestito

Coated PVC/ PVC enduit/ PVC recubierto

## PVC Rivestito:

Realizzato per estrusione plastica. Viene successivamente ricoperto mediante pellicole antigraffio che derivano direttamente dalle tecnologie di rivestimento utilizzate nell'industria dell'arredamento. Sono caratterizzate pertanto da elevato effetto cromatico decorativo e altissima resistenza all'acqua, umidità.  
Non pulire con materiale abrasivo.

## Vantaggi:

Antigraffio.  
Resistente all'acqua.  
Grande disponibilità di colori vivaci e decorativi.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Inattaccabile dai raggi UV.  
Durata nel tempo.  
Riciclabile nella plastica.

## Coated PVC:

Obtained by plastic extrusion, it is subsequently covered with scratch-resistant films which are the same as those used in the furniture industry and are therefore characterized by a high decorative colour effect and very high resistance to water and humidity.  
Do not clean with abrasive material.

## Advantages:

Scratch-resistant.  
Water resistant.  
Wide range of vivid and decorative colours.  
Ease of use: can be cut with a cutter or scissors.  
Resistant to UV rays.  
Durability.  
Recyclable.

## PVC enduit :

Fabriqué par extrusion de plastique. Il est ensuite recouvert d'un film anti-rayures issu directement des technologies de revêtement utilisées dans l'industrie du meuble. Ils se caractérisent donc par un bel effet de couleur très décoratif et une très haute résistance à l'eau et à l'humidité.  
A ne pas nettoyer avec un matériau abrasif.

## Avantages :

Résistant aux rayures.  
Résistant à l'eau.  
Grande disponibilité de couleurs vives et décoratives.  
Facilité d'utilisation : peut être coupé avec un cutter ou des ciseaux.  
Résistant aux rayons UV.  
Durée dans le temps.  
Recyclable en plastique.

## PVC recubierto:

Hecho por extrusión de plástico. Posteriormente se cubre con películas resistentes a los arañazos con las tecnologías de revestimiento utilizadas en la industria del mueble. Por lo tanto, se caracterizan por un alto efecto de color decorativo y una resistencia muy alta al agua, a la humedad.  
No limpiar con material abrasivo.

## Ventajas:

Resistente a los arañazos.  
Resistente al agua.  
Gran disponibilidad de colores brillantes y decorativos.  
Facilidad de uso: se puede cortar con un cortador o tijeras.  
Resistente a los rayos UV.  
Duración en el tiempo.  
Reciclabile en plástico.

# Paraspigoli

## Corner Profiles/ Protecteur D'angle/ Guardacantos

### Paraspigoli:

I Paraspigoli Arcansas sono progettati e prodotti per proteggere gli spigoli verticali ed orizzontali dopo la posa del rivestimento. La rapidità e semplicità di posa è garantita dallo speciale adesivo presente in alcune versioni.

### Paraspigoli in Acciaio Inox:

Ottenuti per profilatura nella lega più nobile disponibile oggi sul mercato, AISI 304 V2A, grazie alla sua elevatissima inossidabilità e resistenza agli agenti meccanici e atmosferici, è adatto per interni ed esterni. Ha un aspetto elegante e solido. Adatto in edilizia, altamente protettivo e decorativo.

### Paraspigoli in Alluminio:

L'alluminio subisce un trattamento di ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il profilo.

### Paraspigoli in alluminio effetto pietra:

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e pre-verniciatura per conferire resistenza e massima adesione alla successiva verniciatura.

### Paraspigoli in PVC:

Ottenuti per estrusione plastica, i profili in PVC Arcansas sono colorati in massa. Non cambiano colore se graffiati.

### Corner Profiles:

Arcansas Corners Profiles are designed and produced to protect vertical and horizontal corners with out without ceramic tiles coating. The special adhesive tape guarantees a quick and easy installation.

### Stainless-steel corner profiles:

Obtained by profiling in alloy AISI 304 V2A, the most noble alloy available on the market today, thanks to its high resistance to the rust and to mechanical and atmospheric agents, it is suitable both for indoors and outdoors. It has an elegant and solid appearance. Suitable for construction, highly protective and decorative.

### Aluminium corner profiles:

The aluminium is anodized by immersion in electrolytic tanks and subsequently in the colour tanks, creates a protective layer that protects the colour itself.

### Stone look aluminium corner profiles:

Obtained by extrusion and subsequent painting with electrostatic epoxy powders, they are previously treated with a special degreasing and pre painting process to give resistance and maximum adhesion to the subsequent painting.

### PVC corner profiles:

Arcansas PVC profiles are mass-colored. They do not change colour if scratched.

### Protecteur D'angle:

Les protecteur d'angle Arcansas sont conçus et fabriqués pour protéger les bords verticaux ou horizontaux après la pose du revêtement. La rapidité et la simplicité d'installation sont garanties par l'adhésif spécial présent dans certaines versions.

### Protecteur d'angle en acier inoxydable :

Obtenu par profilage dans l'alliage le plus noble disponible aujourd'hui sur le marché : l'AISI 304 V2A, grâce à sa très haute résistance à la rouille et sa résistance aux agents mécaniques et atmosphériques, convient pour l'intérieur et l'extérieur. Il a une apparence élégante et solide. Convient pour la construction. Hautement protecteur et décoratif.

### Protecteur d'angle en aluminium :

L'aluminium subit un traitement d'oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur qui est ensuite fixée dans les derniers réservoirs du long processus anodique, créant une couche protectrice qui protège le profilé.

### Protecteur d'angle en aluminium effet pierre :

Obtenus par extrusion et ensuite peint avec des poudres époxy électrostatiques, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante.

### Protecteur d'angle en PVC :

Obtenus par extrusion de plastique, les profilés PVC Arcansas sont colorés en masse. Ils ne perdent pas leur couleur s'ils sont rayés.

### Guardacantos:

Los guardacantos Arcansas están diseñados y producidos para proteger los bordes verticales u horizontales después de la colocación de revestimientos. La rapidez y la simplicidad de la instalación están garantizadas por el adhesivo especial presente en algunas versiones.

### Guardacantos en acero inoxidable:

Obtenido al perfilar la aleación más noble disponible en el mercado hoy en día, AISI 304 V2A, gracias a su muy alta resistencia a la oxidación y resistencia a los agentes mecánicos y atmosféricos, es indicado sea para interiores y exteriores. Tiene un aspecto elegante y sólido. Idóneo en construcción, altamente protector y decorativo.

### Guardacantos de aluminio:

El aluminio se somete a un tratamiento de oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el perfil.

### Guardacantos de aluminio con efecto piedra:

Obtenidos por extrusión y pintura posterior con polvos epoxídicos electrostáticos, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura sucesiva.

### Guardacantos de PVC:

Obtenidos por extrusión de plástico, los perfiles de PVC Arcansas son coloreados en masa. No cambian de color si se rayan.

# Listelli

Decorative listello / Equerres de finition / Listeles

**Listelli:**

Il listello decorativo Arcansas è utilizzato per creare una linea elegante sul rivestimento in ceramica. Si abbina magnificamente agli accessori del bagno producendo esclusivi effetti cromatici. Disponibili in differenti dimensioni e finiture.

Viene realizzato per estrusione dell'alluminio e sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6060 per ottenere una colorazione costante per il massimo grado di finitura estetica oltre che funzionale.

**Decorative listello:**

Arcansas decorative listellos are used to create an elegant line on ceramic walls. They beautifully match with bathroom accessories and creates an exclusive chromatic effect. Available in different dimensions and finishing.

It is made by aluminium extrusion and then it is anodized by immersion in electrolytic tanks, creates a protective layer that protects the colour itself. Arcansas guarantees a treatment thickness from 10 to 15µm according to the type of colour for the maximum quality of protection. Arcansas uses alloy 6060 to obtain a constant colour and the highest level of aesthetic and functionally finishing.

**Equerres de finition :**

La bande décorative Arcansas est utilisée pour créer une ligne élégante sur le revêtement en carrelage. Il se combine merveilleusement bien avec des accessoires de salle de bain produisant des effets chromatiques exclusifs. Disponible en différentes tailles et finitions.

Il est fabriqué par extrusion d'aluminium et soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans des baignoires de Couleur, qui est ensuite fixée dans les derniers réservoirs du long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 10 à 15 µm selon le type de couleur pour la meilleure qualité de protection. Arcansas utilise l'alliage 6060 afin d'obtenir une coloration brillante et uniforme pour une finition hautement esthétique et fonctionnelle.

**Listeles:**

El listel decorativo Arcansas se utiliza para crear una línea elegante en el revestimiento cerámico. Se combina maravillosamente con accesorios de baño produciendo efectos cromáticos exclusivos. Disponible en diferentes medidas y acabados.

Se fabrica mediante extrusión de aluminio y se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en los tanques del color que luego se fija en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un grosor del tratamiento de 10 a 15 µm según el tipo de color para la máxima calidad de protección. Arcansas utiliza la aleación 6060 para obtener una coloración constante para el más alto grado de acabado estético y funcional.

# Giunti di dilatazione

Expansion joints/ Joints de dilatation/ Juntas de expansión

## Giunti di dilatazione:

I giunti di dilatazione sono profili specificamente progettati per intervenire in maniera mirata sulle flessioni e compressioni della pavimentazione dovute principalmente alla costante pressione degli agenti atmosferici e ad escursione termica - in caso di superfici esterne - o ai continui movimenti della stessa pavimentazione che possono generare il prematuro distacco del rivestimento - anche in superfici interne.

La versatilità del profilo ne permette un'applicazione su diverse tipologie di pavimento, anche aventi diversa natura e spessore.

Si consiglia l'uso di giunti di dilatazione almeno ogni 15 Mq di superficie piastrellata.

## Expansion joints:

Expansion joints are profiles specifically designed to face the needs of thermal expansion and contraction in indoor and outdoor floors that can bring about detachment or damage to the coating. Arcansas expansion joints are very versatile and can be used in different types of floors, even with different thickness and material. The use of expansion joints is recommended at least every 15 square meters of tiled surface.

## Joints de dilatation :

Les joints de dilatation sont des profils spécifiquement conçus pour intervenir de manière ciblée sur les flexions et compressions du revêtement de sol dues principalement due à la pression constante des agents atmosphériques et à l'excursion thermique (dans le cas de surfaces externes) ou aux mouvements continus de ce même revêtement de sol qui peuvent engendrer le détachement prématuré du revêtement - même sur les surfaces internes.

La polyvalence du profil permet de l'appliquer à différent type de revêtements de sol, ayant également une nature et une épaisseur différentes.

Nous recommandons l'utilisation de joints de dilatation au moins tous les 15 mètres carrés de surface carrelée.

## Juntas de expansión:

Las juntas de expansión son perfiles diseñados específicamente para intervenir de manera específica en las flexiones y compresiones del suelo debido principalmente a la presión constante de los agentes atmosféricos y a la amplitud térmica - en el caso de superficies externas - o a los movimientos continuos de los mismos suelos que pueden generar despegue prematuro del revestimiento, incluso en superficies internas.

La versatilidad del perfil permite que se aplique a diferentes tipos de suelos, también con diferente naturaleza y grosor.

Recomendamos el uso de juntas de expansión al menos cada 15 metros cuadrados de superficie de baldosa.

# Profili per top Cucina

Kitchen worktop cover profiles/ Profilés pour les plans de travail de cuisine/  
Perfiles para encimeras de cocina

## Profili per top cucina:

Profili progettati per integrare ogni tipologia di piano top definendo il contorno degli spazi. Queste profili vengono utilizzati principalmente per i collegamenti tra i piani di lavoro e la superficie della parete, ma possono essere applicati anche in altri luoghi dove è necessario mascherare le imperfezioni in giunzioni angolari delle superfici. Proteggendo contro l'intrusione di contaminanti e acqua.

## Vantaggi:

Impermeabile e antibatterico. Assicura una giunzione perfetta e sigillata.

## Kitchen worktop cover profiles:

These profiles are conceived to define worktop edges and design. They are mainly used as connection between worktop and walls, but they can also be used to cover any kind of corner connection between surfaces. They protect against the intrusion of contaminants and water.

## Advantages:

Waterproof and antibacterial. Ensures a perfect and sealed joint.

## Profilés pour les plans de travail de cuisine :

Profilés conçus pour intégrer chaque type de plan supérieur de travail en définissant le contour des espaces. Ces profilés sont principalement utilisés pour les connexions entre les surfaces de travail et la surface du mur, mais ils peuvent également être appliqués dans d'autres endroits où il est nécessaire de masquer les imperfections dans les joints d'angle des surfaces. Ils protègent contre l'intrusion de contaminants et de l'eau.

## Avantages:

Imperméable et antibactérien. Assure un joint parfait et étanche.

## Perfiles para encimeras de cocina:

Perfiles diseñados para integrar cada tipo de encimera definiendo el contorno de los espacios. Estos perfiles se utilizan principalmente para las conexiones entre las superficies de trabajo y la superficie de la pared, pero también se pueden aplicar en otros lugares donde es necesario esconder imperfecciones en las esquinas de las superficies. Protegen contra la intrusión de contaminantes y agua.

## Ventajas:

Impermeable y antibacteriano. Asegura una unión perfecta y sellada.

# Profili di raccordo igienico

Sanitary-wear profiles/ Profilés de connections hygiéniques /  
Perfiles de conexión higiénica

## Profili di raccordi igienico:

Sono profili progettati per risolvere ogni esigenza di raccordo igienico raggiato tra pavimento e parete secondo le norme igienico sanitarie europee. Si caratterizza per la semplicità di posa. Il materiale utilizzato è una speciale e pregiata composizione plastica atta ad ottenere un aspetto lucido brillante a tutto corpo, donandole un effetto porcellanato. Non pulire con materiale abrasivo.

## Vantaggi:

Non teme raggi UVA, graffi, detersivi. Può essere impiegato anche in esterno.

## Sanitary-wear profiles:

These profiles are designed to satisfy every need in terms of connection between floor and walls according to European health and hygiene standards. Easy to install, it is made by a special and fine plastic melt conceived to obtain a shiny bright porcelain look. Do not clean with abrasive materials.

## Advantages:

Resistant to UV rays, scratches and detergents it can also be used outdoors.

## Profilés de connections hygiéniques :

Ces profilés sont conçus pour répondre à tous besoin d'une connection hygiénique arrondie entre le sol et le mur conformément aux normes sanitaires européennes. Ils se caractérisent par la simplicité d'installation. Le matériau utilisé est une composition plastique spéciale et précieuse qui donne un aspect brillant, un effet porcelaine. Ne pas nettoyer avec un matériau abrasif.

## Avantages:

Il ne craint pas les rayons UVA, les rayures, les détergents. Il peut également être utilisé à l'extérieur.

## Perfiles de conexión higiénica:

Estos perfiles están diseñados para resolver cualquier necesidad de una conexión higiénica redondeada entre el piso y la pared de acuerdo con las normas sanitarias europeas. Se caracteriza por la facilidad de instalación. El material utilizado es una composición plástica especial y preciosa capaz de obtener una apariencia brillante completa, dándole un efecto de porcelana. No limpiar con material abrasivo.

## Ventajas:

No teme a los rayos UVA, arañazos, detergentes. Se puede alpicar tambien al exterior.

# Drenaggio

Drainage/ Drainage/ Drenaje

## Drenaggio:

I canali doccia Arcansas arricchiscono le nostre proposte in fatto di dispositivi di drenaggio.

Moderni, eleganti, ideali per docce, bagni, saune, piscine, centri benessere, palestre o impianti sportivi.

Canali e griglie sono prodotti in acciaio inox AISI 304 EN 1.4301, in 5 lunghezze da 60 a 100cm. Tutti i modelli sono conformi alla normativa EN 274-1: 2002 e sono adatti per rivestimenti con altezza massima fino a 15 mm.

## Vantaggi:

I canali doccia offrono un miglior drenaggio. Ottima Impermeabilità. Adattamento a qualsiasi bagno e ad ogni esigenza personale.

## Drainage:

Arcansas drainage channels complete our range of drainage devices.

Innovative, stylish, ideal for showers, bathrooms, swimming pools, spas, gyms and sports facilities.

Water collection channel and grilles are made from AISI 304 EN 1.4301 stainless steel and are available in 5 different lengths from 60 to 100cm. All models comply with EN 274-1: 2002 standards and are suitable for covering tiles up to 15mm.

## Advantages:

Shower channels offer a better water drainage. Excellent waterproofness. Easy-going solution for any kind of ambience and personal need.

## Drainage :

Les caniveaux de douche Arcansas enrichissent nos propositions en termes de dispositifs de drainage. Modernes, élégants, idéals pour les douches, salles de bain, saunas, piscines, spas, gymnases ou installations sportives.

Les canaux et les grilles sont fabriqués en acier inoxydable AISI 304 EN 1.4301, en 5 longueurs de 60 à 100 cm. Tous les modèles sont conformes à la norme EN 274-1: 2002 et conviennent aux revêtements d'une hauteur maximale de 15 mm.

## Avantages:

Les caniveaux de douche offrent un meilleur drainage. Excellente imperméabilité. Adaptation à toute salle de bain et à chaque besoin personnel.

## Drenaje:

Las canaletas de ducha Arcansas enriquecen nuestras propuestas en términos de dispositivos de drenaje. Modernas, elegantes, ideales para duchas, baños, saunas, piscinas, spas, gimnasios o instalaciones deportivas.

Las canaletas y rejillas se producen en acero inoxidable AISI 304 EN 1.4301, en 5 longitudes de 60 a 100 cm. Todos los modelos cumplen con la norma EN 274-1: 2002 y son adecuados para recubrimientos con una altura máxima hasta 15 mm.

## Ventajas:

Las canaletas de ducha ofrecen un mejor drenaje. Excelente impermeabilización. Adaptación a cualquier baño y a cada necesidad personal.

## Arcansas LAY / MEMBRANA ISOLANTE

	Cod.	EAN	Descrizione	Min. ord.	€/pz
	GU/500 	8013237140311	Membrana isolante	1m x 30m= 30 m <sup>2</sup>	450,25

# Arcansas® LAY

## MODALITÀ DI POSA

1. La superficie di applicazione deve essere liscia e priva di residui che possano comprometterne l'adesione. Se necessario, livellare la superficie prima di posare Arcansas LAY.
2. Il collante con il quale fissare la guaina Arcansas LAY al supporto deve essere adeguato al tipo di supporto stesso. Di norma per la maggior parte dei supporti è possibile usare un normale adesivo per piastrelle a presa idraulica. La colla deve aderire meccanicamente al sottofondo ed al tessuto della guaina, quindi verificare preventivamente eventuali incompatibilità tra i materiali.
3. Applicare il collante sul sottofondo utilizzando una spatola dentata idonea ( da 3 x 3 mm o 4 x 4 mm ).
4. Tagliare a misura i teli di Arcansas LAY necessari al progetto ed applicarli sullo strato di colla precedentemente steso. Premere la guaina con il lato liscio della spatola dentata in direzione obliqua rispetto alla guaina stessa, esercitando una certa pressione, in modo tale da evitare la formazione di bolle d'aria.
5. Nei punti di giunzione, i teli della guaina Arcansas LAY devono necessariamente essere sovrapposti per almeno 5 cm.
6. Dopo aver realizzato una perfetta impermeabilizzazione e dopo avere effettuato i dovuti sormonti in prossimità di angoli e raccordi, si può procedere con la posa del rivestimento. Non è necessario attendere la presa del collante utilizzato per la posa della guaina.
7. Per la posa del rivestimento applicare il collante a presa idraulica direttamente sulla guaina Arcansas LAY, posando le piastrelle possibilmente a letto pieno. Nel caso di rivestimenti sensibili a particolari agenti chimici è necessario utilizzare collanti e prodotti per fughe adatti.

## INSTALLATION INSTRUCTIONS

1. The laying surface must be smooth and free of any residues that could adversely affect the adhesion. If necessary, level the surface before laying Arcansas LAY.
2. The adhesive used to fix the Arcansas LAY mat to the support must be suitable for the type of support itself. As a rule, for most of the supports, it is possible to use a normal glue for tiles with hydraulic grip. The glue must adhere mechanically to the substrate and to the fabric of the mat, consequently check beforehand for any incompatibilities between materials.
3. Apply the glue to the substrate using a suitable notched trowel ( of 3 x 3 mm or 4 x 4 mm ).
4. Cut to size the Arcansas LAY mats needed for the project and apply them to the previously laid layer of glue. Press the mat to the glue, using the smooth side of the notched trowel in an oblique direction respect to the mat, so as to avoid air bubbles.
5. At the junction points, the Arcansas LAY mats must absolutely be overlaid of at least 5 cm.
6. Once having made a perfect waterproofing and after having done the necessary overlaps at the corners and joints, you can proceed with the laying of the covering. It is not necessary to wait for the glue to grip for the installation of the mat.
7. For the laying of the covering apply the hydraulic grip glue directly on the Arcansas LAY mat, laying the tiles with plenty of glue. In the case of coverings sensitive to particular chemical agents, it is necessary to use suitable adhesives and products for the joints.

Arcansas LAY è una guaina impermeabilizzante in polietilene morbido, rivestita su entrambi i lati di una speciale tessutona-tessuto feltrato che ne garantisce la presa con il collante. Si tratta di un sistema d'impermeabilizzazione da installare direttamente sotto al pavimento o rivestimento in ceramica/ pietra naturale, con stampa centimetrata sulla superficie, in modo da facilitarne il taglio su misura al momento della posa.

Arcansas LAY est une natte d'étanchéité en polyéthylène souple, revêtu sur les deux faces avec un tissu feutré non tissé spécial, qui garantit l'ancrage avec la colle. C'est un système d'imperméabilisation qui se pose directement sous le sol ou revêtement, en céramique/pierre naturelle, avec une impression au centimètre sur la surface pour en faciliter la découpe sur mesure au moment de la pose.

Arcansas LAY is a waterproofing mat in soft polyethylene, covered on both sides with a special non-woven felted fabric which guarantees the grip with the glue. It is a waterproofing system to be installed directly under the ceramic/natural stone flooring or cladding, with a centimetre print on the surface, so as to ease the custom cutting during the installation.

Arcansas LAY es una funda de polietileno impermeable cubierto en ambos lados con un tejido no tejido especial de fieltro, lo que garantiza su agarre con el adhesivo. Es un sistema impermeabilizante para ser instalado directamente debajo del suelo o revestimiento de cerámica/piedra natural, con estampado centimétrico en la superficie, para facilitar el corte a medida a la hora de la colocación.

## MISE EN OEUVRE

1. La surface de pose doit être lisse et sans aspérité pour ne pas compromettre l'adhérence. Au besoin, niveler la surface avant de poser Arcansas LAY.
2. La colle avec laquelle fixer la natte Arcansas LAY au support doit être adéquate au type du support. En général, dans la plupart des supports, il est possible d'utiliser une normale colle à prise hydraulique pour carreau. La colle doit adhérer mécaniquement au fond et au tissu de la natte, il faut donc vérifier à priori d'éventuelles incompatibilités entre les matériaux.
3. Appliquer la colle sur le fond en utilisant une truelle dentelée (de 3 x 3 mm ou 4 x 4 mm).
4. Découper sur mesure les nattes Arcansas LAY nécessaires pour le projet et appliquer-les sur la couche de colle précédemment étendue. Faire pression sur la natte avec le côté lisse de la truelle dentelée, dans la direction oblique par rapport à la natte, pour éviter la formation des bulles d'air.
5. Aux points de jonction, les nattes Arcansas LAY doivent nécessairement se chevaucher d'au moins 5 cm.
6. Après avoir réalisé une étanchéité parfaite et après avoir fait les recouvrements nécessaires en proximité des angles et des raccords, vous pouvez procéder à la pose du revêtement. Il n'est pas nécessaire d'attendre l'adhérence de la colle pour la pose de la natte.
7. Pour la pose du revêtement, appliquer la colle à prise hydraulique directement sur la natte Arcansas LAY, posant les carreaux avec abondance de colle. Dans le cas de revêtements sensibles à des agents chimiques particuliers, il est nécessaire d'utiliser des colles et produits pour des joints appropriés.

## MÉTODO DE COLOCACIÓN

1. La superficie de aplicación debe ser lisa y libre de residuos, lo que podría comprometer su adhesión. Si necesario, nivelar la superficie antes de la colocación de ARCANSAS LAY.
2. El pegamento con el que se fija la funda ARCANSAS LAY al soporte debe ser apropiado al tipo de soporte en sí. Normalmente para la mayoría de los soportes se pueden utilizar con un adhesivo normal para azulejos con agarre hidráulico. El pegamento debe adherirse mecánicamente al sustrato y al tejido de la funda, por eso hay que verificar de antemano si hay alguna incompatibilidad entre los materiales.
3. Aplicar el pegamento al sustrato con una espátula dentada adecuada (de 3 x 3 mm o 4 x 4 mm).
4. Cortar a medida las hojas de ARCANSAS LAY necesarias para el proyecto y aplicarlas a la capa de pegamento previamente aplicada. Presionar la funda con el lado liso de la espátula dentada en la dirección oblicua a la funda misma, ejercitando cierta presión, para evitar la formación de burbujas de aire.
5. En los puntos de unión, las hojas de la funda ARCANSAS LAY deben ser necesariamente sobrepuestas por lo menos hasta 5 cm.
6. Después de realizar una perfecta impermeabilización y después de hacer las sobreposiciones necesarias cerca de las esquinas y conexiones, se puede proceder a la colocación del revestimiento. No es necesario esperar el agarre del pegamento utilizado para la colocación de la funda.
7. Para la colocación del revestimiento, aplicar el pegamento directamente sobre la funda ARCANSAS LAY, colocando los azulejos posiblemente en llenado. En el caso de recubrimientos sensibles a agentes químicos particulares es necesario usar adhesivos y productos para uniones adecuadas.

## Arcansas MAT / MEMBRANA DESOLIDARIZZANTE

	Cod.	EAN	Descrizione	Min. ord.	€/pz
					

# Arcansas<sup>®</sup> MAT

## MODALITÀ DI POSA

1. La superficie di applicazione deve essere liscia e priva di residui che possano comprometterne l'adesione. Se necessario, livellare la superficie prima di posare Arcansas MAT.
2. Il collante con il quale fissare il tappeto Arcansas MAT al supporto deve essere adeguato al tipo di supporto stesso. Per la maggior parte dei sottofondi è possibile utilizzare un adesivo a letto sottile ed a presa idraulica. È preferibile impastare la colla per incollaggio della guaina al sottofondo con elevata fluidità, rispettando i limiti indicati dal produttore del collante. La colla deve aderire meccanicamente al sottofondo ed al tappeto, quindi verificare preventivamente eventuali incompatibilità tra i materiali.
3. Applicare il collante sul sottofondo utilizzando una spatola dentata idonea.
4. Tagliare a misura i rotoli di Arcansas MAT necessari al progetto ed applicarli sullo strato di colla precedentemente steso. Premere la guaina sul collante utilizzando un frattazzo, facendo attenzione ad applicare il tappeto ben teso, esercitando una leggera trazione. Affiancare quindi tutti i rotoli necessari a ricoprire la superficie della pavimentazione.
5. Per evitare che il tappeto posato si danneggi o si distacchi dal sottofondo, si consiglia di proteggerlo da eccessive sollecitazioni meccaniche, posando assi di camminamento in corrispondenza dei punti di trasporto materiali. Evitare inoltre l'esposizione diretta ai raggi solari o alle intemperie. Rimuovere eventuali ristagni d'acqua dalle cavità quadrate prima di applicare l'adesivo.
6. È possibile posare la pavimentazione subito dopo l'applicazione di Arcansas Mat semplicemente stendendo uno strato di colla adeguata al tipo di pavimentazione. Rasare le cavità quadrate della guaina con la parte liscia della spatola e quindi stendere subito il collante con la parte dentata, possibilmente in un unico procedimento. Si raccomanda di realizzare una posa a letto pieno ed utilizzare una spatola dentata con denti idonei al formato delle piastrelle.
7. In caso di estese superfici di posa del tappeto Arcansas MAT è necessario suddividere la pavimentazione con giunti di dilatazione.

## INSTALLATION INSTRUCTIONS

1. The receiving surface must be smooth and free of any residues that could adversely affect the adhesion. If necessary, level the surface before laying Arcansas MAT.
2. The glue used to fix the Arcansas MAT rug to the support must be suitable for the type of support itself. For most of the substrates, it is possible to use a thin layer of glue with hydraulic grip. It is preferable to mix the glue with a high fluidity, respecting the limits given by the glue producer, for the gluing of the mat to the substrate. The glue must adhere mechanically to the substrate and to the mat, consequently check beforehand eventual incompatibility between the materials.
3. Apply the glue to the substrate using an appropriate notched trowel.
4. Custom cut the rolls of Arcansas MAT needed for the project and lay them on the layer of glue previously laid. Press the mat to the glue using a trowel, paying attention to lay the mat well stretched, exerting a slight pull. Then place all the necessary rolls to cover the surface of the flooring.
5. To prevent that the installed mat from getting damaged or detached from the substrate, we suggest to protect it from excessive mechanical stress, to place walkway boards on the track for material transport. Furthermore, avoid the exposure to direct sunlight or bad weather. Remove eventual stagnant water from the square cavities before applying the glue.
6. It is possible to lay the flooring immediately after the application of the Arcansas Mat simply by spreading a layer of glue, adequate to the type of flooring. Smoothen the square cavities of the mat with the smooth part of the spatula and consequently immediately spread the glue with the notched part, possibly in a unique process. We recommend to make a full bed gluing installation and to use the notched trowel with appropriate notches according to the tile format.
7. In case of wide installation surfaces of the Arcansas MAT, it is necessary to divide the flooring with expansion joints.

Arcansas MAT è un tappeto in polietilene con cavità quadrate su un lato e tessuto in fibra sul retro. Esso permette la posa di pavimentazioni ceramiche o in pietra naturale anche in caso di sottofondi problematici, neutralizzando la trasmissione delle tensioni dal sottofondo al pavimento.

Arcansas MAT est une natte en polyéthylène avec des cavités carrées sur une face et un tissu en fibre sur l'autre. Celle-ci permet la pose de sols en céramique ou en pierre naturelle même dans les cas de fonds problématiques, neutralisant la transmission des tensions du support au sol.

Arcansas MAT is a polyethylene mat with square cavities on one side and fibre fabric on the back. It allows the installation of ceramic or natural stone floorings also in case of problematic substrates, neutralizing the stresses transmission from the substrate to the floor.

Arcansas MAT es una lámina de polietileno con cavidades cuadradas en un lado y tejido de fibra en la parte de atrás. Esto permite la colocación de suelos cerámicos o de piedra natural incluso en el caso de cimientos problemáticos, neutralizando la transmisión de tensiones desde el sustrato al suelo.

## MISE EN OEUVRE

1. La surface de pose doit être lisse et sans aspérité pour ne pas compromettre l'adhérence. Au besoin, niveler la surface avant de poser Arcansas MAT.
2. La colle avec laquelle fixer la natte Arcansas MAT au support, doit être adéquate au type de support. Pour la plupart des supports, il est possible d'utiliser une colle de mince application et à prise hydraulique. Il est préférable de mélanger la colle, pour la fixation de la natte au support, avec une grande fluidité, tout en respectant les limites indiquées par le producteur de la colle. La colle doit adhérer mécaniquement au support et à la natte, il faut donc vérifier à priori d'éventuelles incompatibilités entre les matériaux.
3. Appliquer la colle sur le support en utilisant une truelle dentelée appropriée.
4. Découper sur mesure les rouleaux de nattes Arcansas MAT nécessaires pour le projet et appliquer-les sur la couche de colle précédemment étendue. Appliquer la natte sur la colle, faisant pression sur celle-ci en utilisant une truelle, de façon que la natte soit bien tendue en exerçant une légère traction. Accoster donc tous les rouleaux nécessaires pour recouvrir la surface du sol.
5. Pour éviter que la natte posée s'endommage ou se détache du support, nous conseillons de la protéger contre les contraintes excessives mécaniques, en plaçant des panneaux de passerelle sur les points de transport des matériaux. En outre, éviter l'exposition directe au soleil ou aux intempéries. Éliminer toute eau stagnante des cavités carrées avant d'appliquer la colle.
6. Il est possible de poser le sol tout de suite après l'application d'Arcansas Mat, en appliquant simplement une couche de colle adéquate au sol. Lisser les cavités carrées de la natte en utilisant la partie lisse de la spatule, en s'assurant que les cavités soient pleines de colle, puis étaler immédiatement la colle adéquate au sol, avec la partie dentelée de la spatule, possiblement en une seule opération. Nous conseillons une pose avec abondance de colle et d'utiliser une truelle dentelée adaptée au format des carreaux.
7. Dans le cas de pose de grande surface de la natte Arcansas MAT, il est nécessaire de diviser la surface avec des joints de fractionnement.

## MÉTODO DE APLICACIÓN

1. La superficie de aplicación debe ser lisa y libre de residuos que puedan comprometer su adherencia. Si es necesario, nivelar la superficie antes de colocar el ARCANSAS MAT.
2. El pegamento con el que se debe fijar la lamina ARCANSAS MAT al soporte debe ser apropiado para el tipo de soporte en sí. Para la mayoría de los sustratos es posible usar un adhesivo de capa fina con un agarre hidráulico. Es preferible mezclar el pegamento para la lamina al sustrato con una alta fluidez, respetando los límites indicados por el fabricante del adhesivo. El pegamento debe adherir mecánicamente al sustrato y a la lamina, por eso hay que verificar de antemano si hay alguna incompatibilidad entre los materiales.
3. Aplicar el pegamento al sustrato con una espátula dentada adecuada.
4. Cortar a medida las laminas de ARCANSAS MAT necesarias para el proyecto y aplicarlas a la capa de pegamento previamente aplicada. Presionar la lamina sobre el pegamento con una frata, teniendo cuidado de colocar la lamina bien estirada, ejerciendo un ligero tirón. Colocar todos los rollos necesarios para cubrir la superficie del piso.
5. Para evitar que la lamina instalada se dañe o se desprenda del sustrato, se recomienda protegerla contra el estrés mecánico excesivo colocando tableros en los puntos de transporte de material. Evite también la exposición directa a la luz solar o al mal tiempo. Retire eventual agua de las cavidades cuadradas antes de aplicar el adhesivo.
6. Es posible colocar el piso inmediatamente después de la aplicación de Arcansas Mat simplemente extendiendo una capa de pegamento adecuada para el tipo de piso. Alisar las cavidades cuadradas de la funda con la parte lisa de la espátula y luego extender inmediatamente el adhesivo con la parte dentada, posiblemente en un solo procedimiento. Se recomienda colocar los azulejos en llenado y usar una espátula dentada con dientes adecuados para el tamaño de los azulejos.
7. En el caso de superficies extendidas de colocación de la lamina ARCANSAS MAT, es necesario dividir el piso con juntas de expansión.

# Profili per Balcone

Balcony profiles/ Profilés pour Balcon/ Perfiles para Balcón

## Profili balcone:

Profilo con bordo di contenimento superiore che rende idonea la posa evitando l'uso di soglie. Protegge e rifinisce i bordi esterni del balcone evitando il contatto diretto dell'acqua piovana con il massetto in cemento. La sua sezione inclinata e con fori di drenaggio consente il defluire dell'acqua e umidità penetrata attraverso le fughe della pavimentazione evitando il sollevamento delle piastrelle.

Sistema composto da 3 elementi (barra profilo perimetrale da 2,7 mt, angolo esterno, giunto di raccordo). Realizzato in alluminio e sottoposto a processo di anodizzazione che garantisce una buona resistenza agli agenti chimici ed atmosferici. Disponibile in diversi colori e in finiture lucide ed effetto pietra.

## Vantaggi:

Funzione di protezione. Assicurano un corretto deflusso delle acque meteoritiche. Evitano le infiltrazioni. Profili resistenti e leggeri.

## Balcony profiles:

Innovative edging profile specifically designed to permit the efficient run-off of water and to replace the old marble edges. It covers the external edges of the balcony and protects the screed from rainwater. Its sloped section and its perforated anchoring flange allow the run-off of the water and humidity seeped through the flooring grout lines, avoiding tiles damages.

Besides the 2,7mt profile, Arcansas supplies also precutted external corners and joints. All components are made from aluminium and are available in several different colours and finishing.

## Advantages:

Protection of the external edges of the balcony. Ensure the efficient run-off of rainwater. Prevent seepages. Light and resistant profiles.

## Profilés pour balcon :

Profilé avec bord de confinement supérieur qui le rend approprié pour l'installation en évitant l'utilisation de seuil. Il protège et termine les bords extérieurs du balcon en évitant le contact direct de l'eau de pluie avec la chape en béton. Sa section inclinée et avec des trous de drainage permet l'écoulement de l'eau et de l'humidité qui pénètrent à travers les joints du plancher en évitant le soulèvement des carreaux.

Système composé de 3 éléments (barre profilée de 2,7 m de périmètre, coin extérieur, joint de raccordement). Fabriqué en aluminium et soumis à un processus d'anodisation qui garantit une bonne résistance aux agents chimiques et atmosphériques. Disponible en différentes couleurs et dans des finitions brillantes et effet pierre.

## Avantages:

Fonction de protection. Ils assurent un bon écoulement des eaux météoriques. Ils évitent les infiltrations. Profilés résistants et légers.

## Perfiles para balcón:

Perfil con borde de contención superior que hace que la instalación sea adecuada evitando el uso de umbrales. Protege y termina los bordes externos del balcón evitando el contacto directo del agua de lluvia con la solera de hormigón. Su sección inclinada y con orificios de drenaje permite que el agua y la humedad penetren a través de las juntas del piso evitando el levantamiento de las baldosas.

Sistema compuesto por 3 elementos (barra de perfil perimetral de 2,7 m, esquina externa, junta de conexión). Fabricado en aluminio y sometido a un proceso de anodización que garantiza una buena resistencia a los agentes químicos y atmosféricos. Disponible en diferentes colores y en acabados brillantes y efecto piedra.

## Ventajas:

Función de protección. Aseguran la salida adecuada de las aguas meteorológicas. Evitan las infiltraciones. Perfiles resistentes y ligeros.

**Hygienic cove profiles**

For this product range ask for other Arcansas catalogues

**Flooring profiles**

For this product range ask for other Arcansas catalogues

**Profiles for hardware/diy**

### Profiles for tiling

-  **Facilitate** the installation and increase life time of the tile
-  **Hide** the rough outer edge of the tile
-  **Make safe and finish** the external edges of columns, niches and shelves
-  Ideal for **wall and floor**
-  Available in **stainless steel, aluminum** and **PVC** to meet the needs of any project

### Flooring profiles

-  **They join and harmonize** coplanar floors or with level differences
-  **Non-slip knurled surface**
-  Adhesive fixing for a **do-it-yourself, quick and simple installation**
-  **Fixing with rails** suitable for wooden floors
-  **Safe fixing** for high stability in civil and high traffic environments
-  **Fixing screws included** of the same colour of the matched profile

### Hygienic cove profiles

-  **Prevent water and mold from infiltrating** through the wall edge of the shower, tub and sink
-  **Conceal the sealant** that deteriorates over time
-  Concave shape **prevents the deposit of dirt and bacteria**, facilitating the cleaning
-  **White gloss finish** with a **porcelain effect** that does not yellow
-  **Immediate application** in the self-adhesive version

### Profiles for hardware/diy

-  **Lightweight, handy** to transport
-  **Variety of cross-sections** for do-it-yourself projects
-  **Easy to drill, cut, weld and paint**
-  Exclusive colour ranges: **we are the only one to offer glossy finish PVC and mat black aluminium**
-  **Color fixed by anodic bath** that does not deteriorate

agents for the sales network (Italian and foreign market)

**AN INTERNATIONAL NETWORK**

**Not only Italy:** we are present on the international market with distribution centers in South America, France and Belgium. By means of a capillary network of agents and merchandisers we constantly support each of our customer, anywhere in the world.

To choose us means to start a path of shared growth. We **work together** with our customers to understand which products and display units suit best to their business and the most effective approach to get the **best performance on the market together with high profitability.**

We care and want to solve the multiple needs of our customers. Each one represents a unique and exclusive reality. We dedicate them our constant attention and care for the details. We support them with passion and continuity, establishing one **real partnership to guarantee medium and long-term results.**

I design every day functional solutions targeted for each customer. My sales manual? **listen** and relate myself with each one of them, to **understand specific needs and targets.**

Lorenzo Tinti, marketing department

● **Arcansas locations Italy / Europe**

**ITALY (Piagge)** | headquarters (production, stock, logistics)

**ITALY (Mondavio)** | branch 1 (production )

display units /

# profit

the character is recognized by its profile

We create **extremely modular and customized display units** for every need, thanks to our thirty years experience in the retail management sector.

Our display units guarantee **high sales performances**, maximizing the profitability of the spaces. Their original and extremely communicative design has very direct objectives: to encourage the customer to stop, inform him and create a product culture, simplify and **make easy the buying process**.

# +30%

sales increase

# +25%

increase in profitability per linear meter

**+20%**  
increased visibility with dedicated graphics

### HIGH PROFITABLE SPACE

Through a dedicated software, we study the **minimum job quantity**, ideal to guarantee the **maximum display capacity** and **ease of extraction of the product**

### INFOGRAPHIC AND VIDEO TUTORIAL

to **support the un-assisted sales** with instructions and **suggestions for product use**

### GRAPHICS AND DEDICATED COMMUNICATION

for an **increase of visibility** up to 20%

### HIGH QUALITY CERTIFIED MATERIALS

**maximum guaranteed load of 300 kg** for each display level and **ease of assembly**

### POCKETS FOR METAL SHEETS

our display units are the only ones to have **pockets for metal sheets included** in the structure

### CONTINUOUS SUPPORT

so that the system always works to the best of its ability (remodeling), according to market trends

logistics / **promptness**

the character is recognized by its profile

Our customers can dedicate themselves only to the important phases of their business: we take care of logistics. **We're the only contact** from transport to storage, to distribution.

We have technologically advanced systems for the management and monitoring of the activities related to distribution, storage and transport. Specific softwares plan accurately the routes and stretch, to ensure the **maximum precision and punctuality in the distribution of the goods.**

**100%**

total traceability for each order up to the client

**48h**

average time for order execution in Italy

logistics /

**YOUR ORDER ALWAYS UNDER CONTROL**

We receive the orders via palmar telematic devices, with which we proceed with loading and unloading of the goods through reading of barcodes on the products. **Online tracking software** allows the customer to constantly monitor the progress of

the order and many others parameters useful for both the accounting of the service and the immediate identification of potential non-conformities, and therefore to their immediate management and solution.

packaging / **pro**tection

the character is recognized by its profile

Choose the solution that best fits your needs. We offer our customers a range of **packaging solutions made purposely for every need:** carton pallets, carton boxes, customized pallets, tubes.

We make your orders special: we do not just think about the delivery, but also about the organisation inside the pallet, placing the materials in a safe way and identifying them with appropriate labels.

**10**

types of dedicated different packagings

packaging /

Tubes

Carton Box

Customized pallet

Carton Pallet

**WORLDWIDE IN COMPLETE SECURITY**

With our packagings and packages, it is possible to make shipments all over the world in total safety, keeping intact the quality of the goods transported.

The occupied space is optimized to a minimum: our packagings, in fact, can be overlapped thanks to the internal steel brackets.

## CONDIZIONI COMMERCIALI

### Ordini, pagamenti e consegne:

1. Se non diversamente indicato, tutte le quantità sugli ordini vengono arrotondate alla quantità per convenzione del presente listino, altrimenti sarà applicato un incremento del prezzo di listino pari al 10%. La maggiorazione sarà del 20% nel caso in cui le quantità richieste siano inferiori a 10 pezzi. (Esempio di arrotondamento: da 11 a 14 arrotondamento a 10, da 15 a 19 arrotondamento a 20)
2. Pagamenti: prima fornitura, contrassegno.
3. Non saranno evase forniture con importi inferiori a €100,00 netto sconti.
4. Tutti gli ordini ricevuti entro le ore 11.00 verranno evasi entro le 24 ore.
5. Per consegne su appuntamento verificare con ufficio ordini fattibilità e sovrapprezzo.
6. Per spese di trasporto consultare l'ufficio commerciale di riferimento.

### Spese varie:

1. Porto Franco per importi fattura superiori a € 250,00.
  2. Per importi Fattura inferiori a € 250,00 verranno addebitati € 15,00 per spese amministrative.
- Rischi nel trasporto: La merce viaggia a rischio e pericolo dell'acquirente, anche se in porto Franco.

## CONDIZIONI GENERALI

### Disegni e documenti descrittivi:

Tutte le Fotografie, i disegni e i dati tecnici dei prodotti a catalogo hanno carattere informativo ed esemplificativo, quindi non impegnativo.

### Modifiche:

Arcansas Profili s.r.l si riserva il diritto di apportare modifiche ai propri prodotti, imballi e quant'altro senza obbligo di preavviso.

### Reclami:

I reclami per vizi o difetti apparenti (es. mancanza o danneggiamento) vanno presentati al corriere direttamente all'atto del ricevimento della merce e tempestivamente anche ad Arcansas Profili s.r.l, a mezzo riserva scritta sulla bolla di consegna specificando il tipo di anomalia, pena la decadenza di qualunque diritto di garanzia e del diritto di risarcimento. I reclami per vizi o difetti non individuabili con un diligente controllo al momento del ricevimento della merce (vizi o difetti occulti), dovranno essere notificati, a pena di decadenza, ad Arcansas Profili s.r.l mediante lettera raccomandata A.R. entro sette giorni dalla scoperta del vizio o difetto e comunque non oltre 12 mesi dalla consegna. Eventuali reclami non daranno diritto all'acquirente di sospendere o ritardare i pagamenti dovuti ad Arcansas Profili s.r.l.

### Garanzia e vizi:

Arcansas Profili s.r.l si impegna a sostituire i prodotti che presentino vizi, mancanza di qualità o difetti di conformità ad essa imputabili, verificatisi entro dodici mesi dalla consegna dei prodotti, purché gli stessi siano stati presentati tempestivamente nelle modalità precedentemente riportate. Arcansas Profili s.r.l. non garantisce la rispondenza dei prodotti a particolari specifiche o caratteristiche tecniche o la loro idoneità ad usi e/o utilizzi particolari, se non nella misura in cui tali caratteristiche siano state espressamente convenute nel contratto. In caso di vizi apparenti e/o occulti riconosciuti da Arcansas Profili s.r.l., l'acquirente ha diritto esclusivamente alla sostituzione del prodotto, che verrà accettato in reso solo in confezioni originali, integre e complete. Nessun prodotto potrà essere sostituito senza una preliminare autorizzazione scritta di Arcansas Profili s.r.l. La presente garanzia è sostitutiva delle garanzie e responsabilità previste per legge ed esclude ogni altra responsabilità di Arcansas Profili s.r.l comunque originata dai prodotti venduti, salvo il caso di dolo e colpa grave.

### Riserva di proprietà:

I prodotti rimangono di proprietà di Arcansas Profili s.r.l sino al loro completo pagamento da parte dell'acquirente. Il mancato pagamento, anche parziale, dà diritto ad Arcansas Profili s.r.l di recuperare la merce oggetto di fornitura, anche se in deposito presso terzi.

### Proprietà industriale e intellettuale:

Segni distintivi, fotografie di prodotti e/o tecnologie produttive e commerciali di Arcansas Profili s.r.l, non dovranno essere utilizzati o divulgati senza la previa autorizzazione scritta di Arcansas Profili s.r.l.

### Privacy:

I dati personali anagrafici e fiscali acquisiti direttamente e/o tramite terzi da Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), titolare del trattamento, vengono utilizzati per esigenze contrattuali e di legge, nonché per consentire un'efficace gestione dei rapporti commerciali. Tali dati potranno essere comunicati in Italia e/o all'estero alla rete di agenti Arcansas Profili s.r.l, società di factoring, istituti di credito, società di recupero crediti, società di assicurazione del credito, società di informazioni commerciali, professionisti e consulenti, trasportatori.

### Foro competente:

Per eventuali controversie derivanti dalle condizioni commerciali e/o dagli ordini ad essa connessi, sarà esclusivamente competente il tribunale di Pesaro.

## BUSINESS TERMS

### Orders, payments, and deliveries:

1. Unless otherwise indicated, all quantities on orders are rounded to the quantity per agreement of this price list: otherwise, a 10% increase in the list price will be applied. The increase will be 20% if the required quantities are less than 10 items. (Example of rounding: from 11 to 14 rounding to 10, from 15 to 19 rounding to 20)
2. Payments: first delivery, cash on delivery.
3. Supplies with amounts less than €100.00 net of discounts will not be processed.
4. All orders received before 11:00 am will be processed within 24 hours.
5. For deliveries by appointment, check with the order feasibility and surcharge office.
6. For transport costs, consult the sales department of reference.

### Other expenses:

1. FOB designated port for invoice amounts over €250.00.
  2. For Invoice amounts lower than €250.00, €15.00 will be charged for administrative expenses.
- Transportation risks: The goods travel at the buyer's risk, even if in an FOB designated port.

## GENERAL CONDITIONS

### Designs and descriptive documents:

All the Photographs, designs, and technical data of the products in the catalogue are informative and illustrative, and so therefore not binding.

### Modifications:

Arcansas Profili s.r.l reserves the right to make changes to its own products, packaging, and anything else without notice.

### Complaints:

Claims for apparent defects (e.g. missing parts or damage) must be presented to the courier directly upon receipt of the goods and also promptly to Arcansas Profili s.r.l, by means of a written reservation on the delivery note specifying the type of anomaly, under penalty of forfeiture of any warranty claims and compensation claims. Claims for defects that cannot be identified with a thorough check upon receipt of the goods (hidden defects) must be notified, under penalty of forfeiture, to Arcansas Profili s.r.l by registered letter with return receipt within seven days from the discovery of the defect and no later than 12 months from delivery. Any complaints will not entitle the purchaser to suspend or delay payments due to Arcansas Profili s.r.l.

### Warranty and defects:

Arcansas Profili s.r.l undertakes to replace products that present defects, lack of quality or lack of conformity attributable to it, which occurred within twelve months of delivery of the products, provided they have been promptly presented in the manner previously reported. Arcansas Profili s.r.l does not guarantee the compliance of the products with particular specifications or technical characteristics or their suitability for particular uses, except to the extent that these characteristics have been expressly agreed in the contract. In the event of apparent and/or hidden defects recognised by Arcansas Profili s.r.l, the purchaser is only entitled to the replacement of the product, which will be accepted as a return only in original, intact, and complete packaging. No product may be replaced without prior written authorisation from Arcansas Profili s.r.l. This warranty replaces the warranties and responsibilities provided for by law and excludes any other liability of Arcansas Profili s.r.l originating from the products sold, except in cases of willful misconduct and gross negligence.

### Retention of title:

The products remain the property of Arcansas Profili s.r.l until their full payment by the purchaser. Failure to pay, even partial, entitles Arcansas Profili s.r.l to recover the delivered goods, even if they are on deposit with third parties.

### Industrial and intellectual property:

Distinctive signs, photographs of Arcansas Profili s.r.l products and/or production and business technologies must not be used or disclosed without the prior written permission of Arcansas Profili s.r.l.

### Privacy:

The personal and tax data acquired directly and/or through third parties from Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), the data controller, are used for contractual and legal requirements, as well as to allow effective management of business relationships. Such data may be communicated in Italy and/or abroad to the network of Arcansas Profili s.r.l agents, factoring companies, credit institutions, debt collection companies, credit insurance companies, business information companies, professionals and consultants, transporters.

### Jurisdiction:

For any disputes arising from the business conditions and/or from the orders connected to it, the Pesaro court will have exclusive jurisdiction.

## CONDITIONS COMMERCIALES

### Commandes, paiements et délais de livraison :

1. Sauf indication contraire, toutes les quantités en commande sont arrondies à la quantité par convention de cette liste de prix, sinon une majoration du prix de liste de 10 % sera appliquée.

L'augmentation sera de 20 % si les quantités requises sont inférieures à 10 pièces. (Exemple d'arrondi : de 11 à 14 arrondis à 10, de 15 à 19 arrondis à 20)

2. Paiements : première livraison, contre remboursement.

3. Les livraisons d'un montant inférieur à 100,00 € net de remises ne seront pas traitées.

4. Toutes les commandes reçues avant 11h00 seront traitées dans les 24 heures.

5. Pour les livraisons sur rendez-vous, vérifiez auprès du bureau de commande de faisabilité et en supplément.

6. Pour les frais de port, consultez le bureau commercial de référence.

### Frais divers :

1. Frais de ports offerts pour les montants de facture supérieurs à 250,00 €.

2. Pour les montants de facture inférieurs à 250,00 €, 15,00 € de frais administratifs seront facturés.

Risques liés au transport : les marchandises circulent aux risques et périls de l'acheteur, même si les frais de port sont offerts.

## CONDITIONS GÉNÉRALES

Dessins et documents descriptifs :

Toutes les photographies, dessins et données techniques des produits du catalogue sont à titre informatif et illustratif, donc non contraignants.

### Modifications :

Arcansas Profili s.r.l se réserve le droit d'apporter des modifications à ses propres produits, emballages et toute autre chose sans préavis.

### Réclamations :

Les réclamations pour vices ou défauts apparents (par exemple, manque ou dommage) doivent être présentées au transporteur directement à la réception de la marchandise et également dans les meilleurs délais à Arcansas Profili s.r.l, au moyen d'une réserve écrite sur le bon de livraison précisant le type d'anomalie, sous peine de déchéance de tout droit de garantie et de réparation.

Les réclamations pour vices ou défauts qui ne peuvent être identifiés avec un contrôle diligent à la réception de la marchandise (vices ou défauts cachés) doivent être notifiées, sous peine de déchéance, à Arcansas Profili s.r.l par lettre recommandée avec accusé de réception dans les sept jours à compter de la découverte du vice ou du défaut, cependant, au plus tard 12 mois après la livraison.

Toute réclamation ne donnera pas le droit à l'acheteur de suspendre ou de retarder les paiements dus à Arcansas Profili s.r.l.

### Garantie et défauts :

Arcansas Profili s.r.l s'engage à remplacer les produits présentant des dommages, des défauts de qualité ou des défauts de conformité qui lui sont imputables, survenus dans les douze mois suivant la livraison des produits, à condition qu'ils aient été présentés dans les meilleurs délais de la manière précédemment signalée.

Arcansas Profili s.r.l ne garantit pas la conformité des produits à des spécifications ou caractéristiques techniques particulières ou leur adéquation à des usages et/ou usages particuliers, sauf dans la mesure où ces caractéristiques ont été expressément convenues dans le contrat.

Si des défauts apparents et/ou cachés sont décelés par Arcansas Profili s.r.l, l'acheteur n'a droit qu'au remplacement du produit, qui ne sera accepté en retour que dans son emballage d'origine, intact et complet.

Aucun produit ne peut être remplacé sans l'autorisation écrite préalable d'Arcansas Profili s.r.l.

Cette garantie remplace les garanties et responsabilités prévues par la loi et exclut toute autre responsabilité d'Arcansas Profili s.r.l provenant des produits vendus, sauf en cas de faute intentionnelle et de négligence grave.

### Réserve de propriété :

Les produits restent la propriété d'Arcansas Profili s.r.l jusqu'à leur paiement intégral par l'acheteur.

Le défaut de paiement, même partiel, autorise Arcansas Profili s.r.l à récupérer les marchandises livrées, même si elles sont en dépôt auprès de tiers.

### Propriété industrielle et intellectuelle :

Les signes distinctifs, photographies des produits Arcansas Profili s.r.l et/ou technologies de production et commerciales ne doivent pas être utilisés ou divulgués sans l'autorisation écrite préalable d'Arcansas Profili s.r.l.

### Confidentialité :

Les données personnelles et fiscales personnelles acquises directement et/ou par l'intermédiaire de tiers auprès d'Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), responsable du traitement, sont utilisées pour les exigences contractuelles et légales, ainsi que pour permettre une gestion efficace des relations commerciales.

Ces données peuvent être communiquées en Italie et/ou à l'étranger au réseau d'agents Arcansas Profili s.r.l, aux sociétés d'affacturage, aux établissements de crédit, aux sociétés de recouvrement de créances, aux sociétés d'assurance-crédit, aux sociétés d'informations commerciales, aux professionnels et consultants, ainsi qu'aux transporteurs

### Tribunal compétent :

Pour tout litige découlant des conditions commerciales et/ou des commandes qui y sont liées, le tribunal de Pesaro sera seul compétent.

## CONDICIONES COMERCIALES

### Pedidos, pagos y entregas:

1. A menos que se indique lo contrario, todas las cantidades de los pedidos se redondean a la cantidad por convención en esta lista de precios. De lo contrario se aplicará un aumento del 10 % sobre el precio de lista.

El aumento será del 20 % si las cantidades requeridas son inferiores a 10 piezas. (Ejemplo de redondeo: de 11 a 14 redondeo a 10, de 15 a 19 redondeo a 20)

2. Pagos: primera entrega, contrarreembolso.

3. No se procesarán los suministros con cantidades inferiores a 100 € netos de descuentos.

4. Todos los pedidos recibidos antes de las 11:00 se procesarán en un plazo de 24 horas.

5. Para entregas con cita previa, consulte con la oficina de pedidos la viabilidad y los recargos.

6. Para los costes de transporte, consulte la oficina comercial de referencia.

### Gastos varios:

1. Puerto franco para facturas superiores a 250 €.

2. Por los importes de las facturas inferiores a 250 euros se cobrarán 15 euros en concepto de gastos administrativos.

Risgos de transporte: la mercancía viaja por cuenta y riesgo del comprador, incluso en el caso de puerto franco.

## CONDICIONES GENERALES

Diseños y documentos descriptivos:

Todas las fotografías, diseños y datos técnicos de los productos del catálogo son informativos e ilustrativos, por lo que no son vinculantes.

### Modificaciones:

Arcansas Profili s.r.l se reserva el derecho de hacer cambios a sus propios productos, embalajes y cualquier otro elemento sin previo aviso.

### Reclamaciones:

Las reclamaciones por defectos o vicios aparentes (por ejemplo, falta o daños) deben presentarse al mensajero directamente al recibir la mercancía y sin demora a Arcansas Profili s.r.l mediante notificación escrita en el albarán de entrega especificando el tipo de anomalía, a cambio de la pérdida de todo derecho de garantía y de compensación.

Las quejas por defectos o vicios no detectables con un control diligente al recibir la mercancía (defectos o vicios ocultos), deben notificarse, so pena de caducidad, a Arcansas Profili s.r.l por carta certificada con acuse de recibo en un plazo de siete días a partir del descubrimiento del defecto o vicio y, en cualquier caso, en un plazo máximo de 12 meses a partir de la entrega.

Cualquier queja no dará derecho al comprador a suspender o retrasar los pagos debidos a Arcansas Profili s.r.l.

### Garantía y defectos:

Arcansas Profili s.r.l se compromete a sustituir los productos que presenten defectos, falta de calidad o falta de conformidad que le sean imputables, que se hayan producido dentro de los doce meses siguientes a la entrega de los productos, siempre y cuando se hayan presentado sin demora en la forma anteriormente comunicada.

Arcansas Profili s.r.l no garantiza la conformidad de los productos con especificaciones o características técnicas particulares o su idoneidad para usos y/o usos particulares, salvo en la medida en que dichas características hayan sido expresamente acordadas en el contrato.

En caso de defectos aparentes y/u ocultos reconocidos por Arcansas Profili s.r.l, el comprador tiene el derecho exclusivo a la sustitución del producto, que se aceptará a cambio únicamente en el embalaje original, intacto y completo.

Ningún producto se podrá reemplazar sin una autorización previa por escrito de Arcansas Profili s.r.l.

Esta garantía sustituye a las garantías y responsabilidades previstas por la ley y excluye cualquier otra responsabilidad de

Arcansas Profili s.r.l en cualquier caso que se derive de los productos vendidos, excepto en caso de intención y negligencia grave.

### Reserva de propiedad:

Los productos son propiedad de Arcansas Profili s.r.l hasta que el comprador los pague en su totalidad.

El impago, aunque sea parcial, da a Arcansas Profili s.r.l el derecho de recuperar los bienes suministrados, aunque estén almacenados con terceros.

### Propiedad industrial e intelectual:

Los signos distintivos, las fotografías de los productos de Arcansas Profili s.r.l y/o las tecnologías de producción y comerciales no se utilizarán o revelarán sin el permiso previo por escrito de Arcansas Profili s.r.l.

### Privacidad:

Los datos personales y fiscales adquiridos directamente y/o a través de terceros por Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), el controlador de datos, se utilizan para los requisitos contractuales y legales, así como para permitir una gestión eficaz de las relaciones comerciales.

Dichos datos se podrán comunicar en Italia y/o en el extranjero a la red de agentes de Arcansas Profili s.r.l, empresas de factoring, instituciones de crédito, empresas de cobro de deudas, compañías de seguros de crédito, empresas de información comercial, profesionales y consultores, transportistas.

### Jurisdicción competente:

Para cualquier controversia que surja en relación con las condiciones comerciales y/o las órdenes conexas, el tribunal de Pesaro tendrá jurisdicción exclusiva.
